GURUDWARA SRI NANAKSAR - SAMADH BHAI

This Gurdwara is located in Village Samadh Bhai of District Moga in Punjab. The total area of the Gurdwara is 24 acres. This Gurdwara was established by Sant Baba Gurdev Singh Ji in the year 1964. On request of the Sangat of Samadh Bhai, the process of establishment of Nanaksar in Samadh Bhai was started by Sant Baba Ishar Singh Ji which was completed by Sant Baba Gurdev Singh Ji. Katha and Kirtanis carried out at this place both in the early morning and evening hours daily as per the Maryada of Nanaksar. Similarly the Akhand Path of Sri Sukhmani Sahib is carried out without any break. Each month, the day of Sankrant is celebrated at this Gurdwara. The Sangat from far and near take the holy bath in the Sarovar and then attend the Sri SampatAkhand Paths of Sri Guru Granth Sahib Ji and Kirtan and Katha by renowned Ragiis.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15 July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service

Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Smt. Seema Jain, IAS, Director of Census Operation, Punjab. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr.PratibhaKumari, Assistant Registrar General (SS) under the guidance & supervision of Dr.R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division**.** I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)
Registrar General &
Census Commissioner, India

New Delhi
Dated:- 16-06-2014

PREFACE

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to include village level data also on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B – volume of the DCHB will now contain Village and Town wise Primary Census Abstract (PCA) alongwith Housing amenities data. Now, this time both Part-A and Part-B of DCHB are being published separately for each district.

This volume of Part-A is giving data for each village within the Community Development (CD) Block and each town in the district. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetteers and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Dr. C. Chandramouli, IAS, Registrar General and Census Commissioner, India and for their directions and support from time to time in accomplishing this onerous task.

The great effort and hard work done by Shri K.S. Bhatnagar, Joint Director, Shri Bhagirath Singh, Deputy Director, Shri Rajender Prasad, Assistant Director, Dr. B.B. Jain, Research Officer (Map), Smt. Renu Bhagat, S.I. Grade II and Shri Santosh Kumar, Compiler are greatly acknowledged.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

Chandigarh (K.S. Bhatnagar)
Dated: .2015 Joint Director

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented

viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

BRIEF HISTORY OF THE DISTRICT

Initially Moga was the part of Firozpur district. Later, on August 7th 1972, Moga tehsil became a part of Faridkot district. In the year 1995, Moga tehsil along with Bagha Purana tehsil clubbed together to form a new district Moga. Now at present Moga district consists of three tehsils viz Nihal Singhwala, Bagha Purana and Moga.

In the past, the Brar communities lived in Moga. They generally called themselves 'Sindhu Brars'. Another prominent community, who lived there were the 'Gils' an important section of Jats. The Gils says that they came from Raja of the Variah Clan of Rajputs, who ruled at Garhmathela. The name 'Gil' is explained by a story to the effect that the Raja had no children by his Rajputni wives and therefore married a Jat women. She born a son. But the other wives of Raja became jealous of her and exposed the newly born baby in a marshy spot in the jungle. The infant was accidently found by the king's minister and called Gil, from the palace where he was found, Gil, meaning moisture.

The Wadan Gils (totally there are twelve sections among Gils) were settled about the beginning of the 17th century in the south and west of Moga. The Barars of Sangar clan attacked them and took these places, and the Gils were driven further to the north. Then they established themselves about Chhirak, Chal and Moga as at present.

Peace was lastly established by the marriage of one of the daughter of Sangar Brars to one of the Gils. This alliance also helped in raising the Brars considerably in the social scale. After the marriage, the daughter of Sangar gave birth to two male children, 'Moga' and 'Vega'. The district was named Moga in the remembrance of the great 'Moga', who was a man of great importance among the Wadan Gils.

Ancient Period:

The history of Moga district pertaining to the ancient period has been traced to the Indus valley civilization. A few sites explored in Moga district link it with the Indus valley civilization sites. The sites explored in Moga sub-division has been classified into Pre-Harappan and Late- Harappan period. The various types of pottery found here from the mounds explored lead to these conclusions.

Medieval Period

The period of history begins with the Mohammedan invasion of India. With the death of the ruler Bhimpala, the mighty Hindushahi dynasty of North western Hindustan which included the present area of 'Moga', came to an end. Then power went into the hands of Muhammedan's. After Sindh, the Punjab was considered to have become the next Muslim kingdom in India.

Kot Ise Khan which is one of the towns of Moga got its name from the great man 'Isa Khan'. Isa khan belonged to the family of Mokalsi (also called Mokal) who is believed to be the actual founder of Faridkot. Family disputes were common between Brars and Isa Khan. Later in a quarrel Isa Khan was killed by Brars and they became dominant. A large number of people living in Moga district, claim to be the descendants of the Brar community.

The struggle for freedom

During the British period, the active influence of the British in all the affairs of Moga district is quite evident. The people of Moga became restless due to the harassment of the British. Finally they raised their voice against the British and thus the 'Struggle for Freedom' was started. Many freedom fighters that were laurelled as revolutionaries belong to Moga district.

Independence and its aftermath

On the eve of Independence in 1947, the Faridkot state was being ruled by Raja Harinder Singh. Accordingly, with the rest of the country, Faridkot state and other areas that is Moga and Muktsar tehsils also became free from the British rule. The most agonizing factor during the process of independence was the mass migration. Almost majority of the Muslim population of 'Moga' district migrated to Pakistan and a large number of non-muslims from West Pakistan shifted to the 'Moga' district which disrupted its whole economy. Even though, the people of Moga area celebrated the achievement of independence with great enthusiasm.

ANALYTICAL NOTE

(i) Physical Features

Origin of Name:

The district has derived its name from the town Moga which was inhabited by the Gils. According to local dictum Moga Singh and Joga Singh were two brothers. Joga Singh's successors established two different villages called Moga Mehla Singh and Moga Ajit Singh. By mingling these two villages a new village called Moga was created which had five pattis on the names of Moga Gil's sons viz Chirag Patti, Sangali Patti, Ausang Patti, Bagha Patti and Rupa Patti.

Location and size:

Moga District is the 17th District drawn on the map of Punjab State on 24th day of November 1995. Before this, Moga was the sub-division of Faridkot District. Moga town the head quarter of the District is situated on Ferozpur-Ludhiana road.

Moga District falls under the jurisdiction of Ferozpur division. Its boundaries touch the boundaries of Jalandhar district in north, Ludhiana district in East, Sangrur in South and Faridkot & Ferozpur in West. It stretches between longitude 75 degree - 15, 75 degree - 25 east and latitude 30 degree - 35 and 31 degree 15 North. It spreads over an area on 2242 km which comes to 4.45 % of the Punjab State.

Area:

According to Surveyor General of India, the area of the district is 2242.0 sqkm. it ranks 12th in area in the State and out of it, 49.65 km is urban, shared between urban civic bodies, whereas the remaining 2192.35 sq. km. is rural. The rural area of the district is derived by subtracting urban area of the district from the total district area, as supplied by the Surveyor General of India. The tehsil wise area, as supplied by the Director, Land Records, Punjab is as follows: (1) Nihal Singhwala tehsil 421.04 sq. km., (2) Bagha Purana 586.44 sq. km (3) Moga tehsil 1234.52 sq. km. The Community Development Block area has, however, been obtained by adding up village areas of the constituent villages, including census towns and outgrowth of Urban Agglomerations (UA), if any.

(ii) Physiography:

The topography of the district could be divided into five physiographic units which are briefly described as under:-

The knowledge of topography is indispensable for understanding the personality of any area in terms of socio-cultural attributes and levels of economic development. Viewed in this perspective, Moga District is characterized by flat alluvial plain formed by river deposition in recent geological past. It is part of interfluvial tract between Satluj and Ghaggar rivers. Thus, it shares the characteristics of Punjab plains or whole of Indo Gangetic plains. Macroscopically, surface topography appears to be flat featureless surface, but microscopic analysis may yield some variation in topography even over a small area covered

by Moga District. However, distinctive geomorphic regions may not be delineated, yet micro geomorphic variation may be highlighted which is the result of changing course of river Satluj in last many centuries.

Slope of the ground is from north-east to south-west as evident from different values of elevations above sea level. Highest elevations are found in north-east where elevations cross 227 metres and lowest elevations are recorded in south-west i.e. about 209 metres. Thus the range of elevational change is 18 metres.

Moga District is part of upland plain between Satluj and Ghaggar rivers and more precisely it is part of south-west Punjab where large part of upland plain is covered with sand dunes or sand. Moga District forms an exception that there is no continuous tract of sand or sand dunes. However, some small sand ridges characterized the topography but now most of them have been cleared.

River System and Water Resources

No perennial river passes through the district, however in earlier days or during last many centuries Satluj used to cross this area, which has now taken northerly, turn and joined with river Beas. The palaeo channel of this river can be seen in this area. Moga *nala* is one such old channel of the river, which is filled with water during rainy season. Moga *nala* enters the district from Ludhiana District near Ajitwal. It flows westward through Moga city and then passes into Faridkot District. Its course is almost parallel to the course of river Satluj. It originates in Ludhiana District.

Canals -

Abohar Branch of Sirhind Canal passes through Moga District and it enters into the district from Ludhiana side. Sirhind Canal is Largest Canal System of Punjab, which provides irrigation facilities to large part of Malwa region. It is a perennial canal constructed by British People in association with Princely States. It takes its birth near Rupnagar from Satluj river. The Abohar Branch of Sirhind Canal crosses the Moga District. Distributaries/channels have been constructed to provide water to agricultural crops.

Apart from the canal irrigation, wells are being used and now the traditional types of wells have been replaced by tubewells run by either electricity or diesel engines.

Soils and Crops

In this district the annual rainfall ranges from 200 mm to 400 mm. The MAT is 24^{o}C while the MAST is 25^{0}C. According to water balance diagram the soil moisture regime is ustic and the soil temperature regime is hypothermic. These soils are very deep, well to moderately well drained with texture varying from sandy loam to silty clay loam. The major soils are sandy, over loamy, coarse loamy and fine loamy.

The soils are cultivated for wheat, rice, potato, sugarcane, oil seeds and other crops. The main constraint of the soils are low to medium fertility, poor tilth in some fine textured soils and low water holding capacity in coarse textured soils.

Most of the soils are highly potential and produced very high yields of wheat, rice, potato, sugarcane and other crops with intensive use of irrigation, fertilizers and other inputs. Fine loamy soils are best suited for paddy and sugarcane cultivation. The productivity of fine textured soils can be improved by maintaining proper soil, water, air relationship.

Climate:

The climate of the district is characterized by dryness (except in the brief monsoon season), a very hot summer and bracing winter. The year may be divided into four seasons. The cold season from about the middle of November to the early part of March is followed by the hot season which lasts till about the end of June. July, August and first half of September constitute the south-west monsoon season. The period from mid-September to about the middle of November may be termed as the post-monsoon or transitional period.

After February, there is a steady increase in temperature. June is generally the hottest month. Scorching hot winds laden with dust blow during summer and on individual days the day temperature reaches even about 45^{o} C. With the onset of the monsoon in the district in around first week of July, there is an appreciable drop in day temperature. The weather is sultry and uncomfortable during rains due to the presence of moisture in the air. After the monsoon, by mid September, there is a rapid drop in the temperature, especially during night. January is usually the coldest month. Cold waves affect the district in the wake of passing the freezing point.

The rainfall in the district generally increases from the south-west towards north-east. About 70 per cent of the annual rainfall is received during the monsoon months (July to September), July being the wettest month. There is also some rainfall during the period from December to March which amounts to about 12 per cent of annual rainfall. The remaining rainfall is received in the rest of the months of the year. The following table shows monthly rainfall of 5 years, 2005-2009 for the district.

Monthly Rainfall: Average of 5 years 2005-2009

	Month	Rainfall (mm)	Month	Rainfall (mm)	
1.	January	8.6	7	July	54.6
2.	February	17.4	8.	August	88.1
3.	March	12.0	9.	September	47.8
4.	April	1.9	10.	October	2.7
5.	May	18.1	11.	November	0.4
6.	June	36.0	12.	December	2.9
	Total			290.5	

(Source: Statistical Abstract of Punjab, 2010)

Major characteristics of the District

Forestry:

Moga district falls under the jurisdiction of Divisional Forest Officer, Firozpur. Forest of the district is situated along with rail, roads and canal strips. Vegetation is also found within the small scattered birs throughout the district. Besides, the plantations along with the drains and bunds are under the management of forest department. The main trees found in the local forest are: Shisham, Kikar, Mango, Tut, Jamun, Serin, Neem, Dak/Darek, Pipal, Eucalyptus, Beriand Khajur etc. Also there is a profuse growth of Kana, Kahi, Arjun, Dale and

Battar etc in the water logged strips of the district. The break up of area under various types of forests in the district during 2009-10 is as follows:

Serial No.	Type of Forest	2009-2010
1	Reserved Forests	-
2	Protected Forests	32
3	Unclassified Forests	-
4	State Forests (Total 1to 3)	32
5	Under S/38 of Indian Forest Act	---

The table reveals that during the 2009-10 the area under forests is 32.0 sq. kms. However, during 2009-10, no area has been reported under reserved forests, whereas 32.0 sq. kms are under State forests.

Natural Economic Resources

Minerals and Mining:

The important mineral resource of the area is Saltpetre, Sand and Clay. Saltpetre occurs as thin yellowish encustations on the surface of Older Alluvium. It also occurs as thin encrustations of yellowish colour at old inhabitation sites. Its occurrence is known from Janner, Moga and south-west of Bagha Purana. Saltpetre is an important source of potassium nitrate and used for the crackers, matches and fertilizers industries. Grey micaceous alluvial sand is being mined along the Sukar nala. It is being used for construction purposes. Top silty clay of Older Alluvium up to 1 to 1.20 metres depth provided a very good raw material for the brick industry and is exploited at a number of places. Large number of brick kilns occurs near Bagha Purana, Nighalsinghwala and Moga.

Land and Land use Pattern:

During 2008-2009, against a geographical area of 168 thousand hectares, the area of the district according to village papers is 223 thousand hectares which shows some difference in the two sets of area arrived at by different methods of measurement adopted by two separate agencies. However, for the purpose of discussion hereinafter we will refer to the area as per village paper only. Out of an area of 223 thousand hectares, 2 thousand hectares is under forest. 23 thousand hectares is put to non-agricultural use, less than 500 hectares is current fallow, and 198 thousand hectares is net area sown in the district, which is 89.0 per cent of the total area. Further out of 198 thousand hectare of net area sown, 185 thousand hectare is sown more than once thus the total cropped area in the district during 2008-09(P) works out of 383 thousand hectares.

Kharif (Sawani) and Rabi (Harhi) are two main harvesting seasons. The principle Kharif crops include paddy (rice), jawar, bajra, sugarcane, and groundnut. The Rabi crops include wheat, gram, barley, some oil seeds, pulses, etc. Seasonal crops are also grown where conditions permit. These are known as Zaid-Kharif and Zaid-Rabi.

Agriculture:

There are two principal crop seasons Kharif (sawni) and Rabi (hari) in the district. Both the seasons are equally important but area wise Rabi is more important of the two as it

reported 195 thousand hectares against 188 thousand hectares reported in Kharif in the year 2008-09. Out of 383 thousand hectares cultivated area the area under food and non-food crops is 357 thousand hectares and 26 thousand hectares, respectively. In terms of percentages the area under food crops is 93.2 per cent against 6.8 per cent under non-food crops. The major and minor crops during Kharif season are; Paddy, Maize, Groundnut, Sugarcane, Cotton, Pulses, Chillies, etc; whereas Wheat, Gram, Barley, Potatoes, Oilseeds are the major and minor crops of the Rabi season. Among the food crops important ones are; Wheat, Rice and Maize, which account for 349 thousand hectares (91.1%).

Moga district is an agricultural district as 77.2 per cent of its population is reported to be residing in the rural areas as per 2011 Census where as agriculture engaged only 48.4 per cent of its main workers during 2011 Census (cultivators 25.5%, agricultural labourers (22.9%). Thus it would be seen that agriculture provide the single largest source of employment in the district and this decline is noticeable during the last few decades.

During 2009-2010, 1,72,000 hectares of area was under rice cultivation in the district. This signifies that rice (paddy) is the most dominant Kharif crop grown in the district. During 2009-2010(P) the district produced 812 thousand metric tonnes of rice at an average yield of 4,721 kg per hectare.

Among the Rabi crops, wheat is the most dominant. During 2009-2010, 1,77,000 hectares of agricultural land was under wheat cultivation. The district produced 779 thousand metric tonnes of wheat during 2009-2010. The average yield of wheat per hectare in the district was 4,401 kgs.

Rapeseed and mustard is also important crops grown in the district and area under cultivation of these crops is 1,000 hectares and produced 1,000 metric ton rapeseed and mustard and yields 1391 kg per hectares.

Out of the total production of 39 metric tonnes of rapeseed and mustard and 6.50 metric tonnes of cotton desi in the state, the share of Moga district was 1.0 thousand metric tonnes and 0.48 metric tones repectively.

The vegetables are also grown in the district. An area of 4,530 hectares was reported under vegetables during 2008-09(P). The breakup of area is as follows. Potatoes 4,530 hectares. The demand for vegetables is picking up in the district as the urban centers have grown over the years. The establishment of various colonies etc. under various central and state projects increased the demand for vegetables.

Besides compost (both in urban and rural), cattle dung and green manures, chemical fertilizers are increasingly being used in this district. During 2009-10, 100,000 tonnes of chemical fertilizers comprising nitrogenous 75,000 tonnes, phosphetic 22,000 tonnes and potassic K2o 3,000 tonnes were consumed in the district for growing improved varieties of wheat, paddy, sugarcane, cotton, etc. The farmers are, however, becoming conscious of the delirious effects of reckless use of chemical fertilizers in their farms. The farming scientists are required to provide them with some alternative nutritive soil agents so that crop yields do not suffer.

Among the fruits, mango Guava is the most suitable to the local soil. Horticulture is gaining popularity in Moga district for the last few years. During 2009-10, an area of 496 hectares was reported under various fruit trees. The break up of area under various fruits is as follows: Kinnows 155 hectares, Orange and Malta 2 hectares, Lemon 6 hectares, Guava

217 hectares, Pear 1 hectares, Peach 12 hectares, Plum 2 hectares, Grapes 4 hectares, Ber 70 hectares, banana 8 hectares and miscellaneous 19 hectares. Farmers have to make their own arrangements for marketing. The farmers have persistently demanded the setting up of some factories to process their produce to bring them remunerative returns from fruits, which require very delicate handling before disposal. Day by day the attitude of the farmers is changing and horticulture has become very popular in the district.

Horticulture:

Horticulture is gaining popularity in the district for the last few years. During 2009-10, an area of 496 hectares was reported under various fruit trees. The break up of area under various fruits is as follows: Kinnow 155 hectares, Orange and Malta 2 hectares, Lemon 6 hectares, Guava 217 hectares,pear 1, peach 12 and plum 2 respectively, Grapes 4 hectares, Ber 70 hectares banana 8 and others 19 hectare. The area under orchards is very limited due to various factors such as high temperature, stormy wind conditions, and unsuitability of sub-soil water for irrigation and inadequacy of canal water. In spite of these limited factors the district has reported sizeable area under Guava, Ber, Orange and Malta & Lemon. The farmers have to make their own arrangements for marketing. The farmers have persistently demanded the setting up of some factories to process their produce to bring them remunerative returns from grapes, which require very delicate handling before disposal. Day by day the attitude of the farmers is changing and horticulture has become very popular in the district.

Irrigation:

Adequate water supply from whatever source is essential for the growth of plants. Crops can be raised successfully only if water is available in adequate quantity either from rain or suface flow or underground. Artificial irrigation was practised in India as far back as the fourth millennium B.C. With the growth of population and consequent need for larger agricultural production, the requirement of irrigation has increased to a great extent. Irrigation is required not only in low rainfall areas and during non-rainy season but also during long breaks in rains in good rainfall areas. The importance of irrigation has become more important with the new farm technology based on high yielding varieties of crops and increased application of fertilizers.

However, during the year 2008-09 the net irrigated area in Moga was reported 198 thousand hectares, out of which 5 thousand hectares was irrigated by government canals and 193 housand hectares by tubewells and wells. Thus percentage of net area irrigated to net area sown worked out to 100.0 per cent for this district during 2008-09. Also during 2008-09, out of 383 thousand hectares gross cropped area, 383.5 thousand hectares was irrigated. During 2008-09 the percentage of gross irrigated area to gross cropped area worked out to 100.0 per cent.

Animal Husbandry:

Live stock, the back bone of the peasantry and the farmer, has traditionally been depending upon draught animals for plouging on milch cattle, mainly cows and buffaloes for milk and other dairy products for domestic use and for supplementing their farm income.

The data on livestock in Punjab is available for the year 2007. It reveals that there are 91,960 cows, 24,4530 buffaloes, 2,300 horses and ponies, 110 donkeys, 390 Mules, 5,320

sheeps, 10,590 goats, 10 camels and 1,070 pigs, (total 3,56,290 animals). Cows and Buffaloes, as else where, are the two most dominant milch animals in the district. The district can boast of a fairly rich cattle wealth. The decline in the number of cattle is attributable to the mechanization of agriculture and transportation, which make lesser demand of draught cattle. However due to the ever- increasing demand of milk in the urban centers, the demand of milch buffaloes, which are mainly of good breads (murrah and nili), has also shoot up.

In 2009-10 there were 54 veterinary Hospitals, 79 veterinary dispensaries and insemination centres and 4 sheep and wool extension centres in the district wherein 29 veterinary officers and 110 veterinary pharmacists were deployed.

The poultry had recorded 274443 birds out of which 2,15,000 broilers 37,000 layers and 22,443 backyard 2007. The poultry farming is now being practiced on scientific lines, which is evident from a large number of poultry farms located in the district. This has been made to understand due to acceptability of egg as a vegetarian food.

Fisheries:

Pisciculture has been taken up in a big way in the district. An area of 425 hectares was stocked with fish wherein 6,272 thousand fingerlings were raised.

Tenancy:

The cultivators generally cultivate their land themselves. This system is known as Khud Kasht (self cultivation). Some times the land is leased out to other farmers or persons on Batai (share cropping) which is usually fixed for one half of the gross produce, payable in kind. Contract or Theka is also in vogue and is fast gaining popularity. This is generally paid in cash on yearly basis but may be agreed to in kind depending upon the land contracted and the economic positions of the cultivator. The Batai or Theka may vary depending upon the productivity of the land. Since large number of people own tractors they prefer to provide agriculture services to the fellow farmers on cash payment. The Jagirdari system has since been abolished after the introduction of various enactments under the land reforms undertaken after independence and merger of the Pepsu areas in the Punjab State.

Communications:

An efficient network of roads and railways, posts, telegraph, telephone etc. is an essential requirement for development of any area as it is the backbone of any developmental activity. This also applies to Moga. The district is well served in both roads and railways. It is well connected by roads and railways with stations inside and outside the district.

Some of the important roads connecting various stations inside and outside the district, besides the National Highway- 110. The main roads are: (1) Moga-Ludhiana Road, (2) Moga-Firozpur Road, (3) Moga Faridkot Road, (4) Moga - Bagha Purana, Kot Kapura - Road, (5) Moga-Nihal Singhwala Road, (6) Moga - Sangrur Road.

Anyhow, there is an efficient network of roads throughout the district. The district has a road length of 110 kms under National highways and 2,471 kms under State highways. Further, as per the data available from P.W.D. (B&R) department for the year 2008-09 the Punjab state has a road length of 73,584 kms giving an overall average of 146 kms per 100 sq. kms of area. This by all means exhibits a fairly well developed system of roads in the State. Moga district has a road length of 129 kms per 100 sq. kms of area which, though

somewhat lower than that of the State as a whole, is quite satisfying in itself. Furthermore, all the villages in the district are connected by road.

The district is well served by the Public Road Transport system. The district being part of erstwhile Pepsu State, the bus routes are mainly with the Pepsu Road Transport Corporation (PRTC), Moga depots had 659 buses in 2009-2010 and government hired buses from private sector on kilometer basis to fulfill the requirements of public. The other depots of PRTC and Punjab Roadways also operate buses on various routes in the district. There are a number of private operators also, who provide transport services in areas not served by Government transport operators.

The increase in vehicles has resulted increase in accidents in the district. In 2009-10 there took place 151 accidents in which 111 persons were killed and 168 injured in the district.

The important private bus operators are as follows:-

1) Libra Bus Service.
2) Sindicate Bus Service Pvt. Ltd.
3) Patiala Bus Service.

The first railway line which served the area of present Moga District was Macleod Ganj road-Ludhiana extension opened in 1905, which was further connected with the main line to Karachi via Macleod Ganj. At present the district lies in the Firozpur Division of the Northern Railway. The district is served by Firozpur-Ludhiana railway line. Stations falling on this line are: Mahna, Ajitwal, Moga, Ghall Kalan, Dagru and Mahesari.

There is no navigable river or canal in the district. Also there is no airport in this district.

There is a good net work of post and telegraph offices in the district. In the year 2009-10 There were 167 post offices and 1 telegraph office. The telephone facilities have also been greatly improved throughout the district barring a few pockets here and there. Mobile and land line telephone have reached almost all villages of the district.

Industry:

This district is not very important from the industries point of view as it did not attract many industrialists to set up their units in the district. However, there were certain places in the district which was known for small scale/cottage industries. Moga was known for Phulkaries.

In fact every village was a self sufficient unit in many respects as arrangements existed, in Kharas (bullock/camel driven flour mills) before the advent of electricity operated chakkis. The kohlus (formerly) wooden driven by bullock were used for oil extraction. The village potters manufactured and supplied pitchers and other earthenware to meet the local demands. Khaddar was made by the village weavers out of soot (yarn) supplied by their clients in the village. The agricultural implements were manufactured by the local carpenters, who manufactured charkhas (spinning wheels), wooden boxes and bullock carts at important places.

With the growth of urban centers the modern industries were set up at various places in the district. The following are some industries located in the district.

Nestle India Limited, Moga:

This unit was established in the private sector at Moga in 1962 by Nestle Company of Switzerland. It was initially named as Food Specialises Limited, Moga, but later its name was changed to Nestle India Ltd., Moga. It is one of the largest dairy plants engaged in the manufacture of various milk products, especially "Everyday" Ghee and condensed milk (Milk-Maid). This plant processes 750,000 lakh liters of milk daily and has many collection centers and 5 chilling units in the district. This company has earned quite a reputation throughout the country.

Besides there are large number of medium and small scale industrial units located in the district which are listed below:-

Rice Shellers - with the popularity of paddy cultivation and large scale purchases of rice by the government large number of rice shellers have come up throughout the district. Agricultural Implements.- throughout the district, but Moga has emerged as an important centre of production of oil-engines and parts manufacture. Mostly in Moga, Sodium Silicate is manufactured which is used in soap manufacturing. Other units concentrated at Moga are Belt fasteners, Hosiery. Radio assembling, Leather tanning and Bus/Truck Body building.

Some of the village and cottage industries located in the district are :

Handloom weaving - Khaddar, Khes, Durries, Chaddars, Country shoes and other leather goods, Leather tanning, Village Ghani-oil, Baan making, Gur and Khandsari, Phulkaris and Earthen-ware are manufactured.

In the year 2009, the district reported 330 registered factories of which all 330 were working factories, which employed 8,384 average number of workers, the district is the lowest in the state.

The State government (Department of Industries) set up Industrial Focal Point, Moga. An area of 108.29 acres was acquired and 209 industrial plots were developed here. Up to 30-9-2010, 209 plots were allotted, whereas, one was lying vacant.

Government also set up Industrial Training Institute at Moga, Sheet Metal Training Centre, Moga (for backward castes) and Government Polytechnic Institutes were established in the district to improve the technical education in the district.

The district being rich in agricultural product, the establishment of agro based industrial units would be an ideal thing. This thinking is being given a practical shape.

Trade and Commerce:

The district was a big centre of grain market, which is important from trade and commerce point of view. Moga has perhaps the largest grain market in the state. The district was a net exporter of food grains like wheat, paddy and maize.

The district has emerged as a leading district in trade and commerce. As per the data available for the year 2009-10, out of 146 regulated markets in the state, 7 are located in Moga district. On an average, each regulated market is serving 46 villages in the district compared with 84 villages in the State as such.

As on March 2010 there are 7 agricultural markets with sub-yards attached to these in the district. The markets are located at the following places: Moga, Bagha Purana, Nihal Singhwala, Badhni Kalan, Ajitwal, Dharmkot and Kot Ise Khan are the biggest grain markets where wheat, paddy, maize, etc. are marketed. Among the market arrivals, the district

reported the highest arrival of paddy during 2009-10. Out of the market arrival of 14,237,000 tonnes of paddy in the State, 1169,000 tonnes (8.21%), was contributed by Moga district. Likewise, the market arrival of wheat 680,000(6.2%) tonnes was contributed by Moga district.

Electricity:

The erstwhile rulers were well aware of the technological changes taking place in the world. They, therefore, were the first to introduce electricity in their areas in the beginning of the present century. The state government Public Works Department replaced the private suppliers of electricity. However, after some time the responsibilities of supplying electricity were bestowed on the Punjab State Electricity Board, Patiala.

During 2009-2010 Moga district consumed 1,114.91 K.W.H. of electricity, the district was 12th highest in the state. The breakup of electricity consumed by various categories of consumers is as follows: Domestic 214.54 K.W.H., Commercial 51.73 K.W.H., Industrial 128.13 K.W.H., Agricultural 716.77 K.W.H. and Others 3.74 K.W.H. If we look back we find that in the year 2000-01 Moga district consumed 558.57 K.W.H. of electricity.

Moga district receives 3.57 percent of the total power produced in the state and its usage for various purposes. In Moga district 88.2 per cent of the households are using electricity and this percentage is lower than that of the State (90.36%).

(ii) Census concepts

Building:

A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses:

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/ asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutcha houses:

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

Dwelling Room:

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House:

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

Village:

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area:

The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The urban area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns: All places with a municipality, corporation, cantonment board or notified town area committee, etc are known as statutory towns.

(b) Census Towns: All other places satisfying the following three criteria simultaneously are treated as Census Towns.

i) A minimum population of 5,000;

ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

City:

Towns with population of 100,000 and above are called cities.

Urban Agglomeration:

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university

campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the exiting town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'urban agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG):

The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc and physically contiguous with the core town of the UA.

Household:

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household:

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household:

Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribes:-

The list of SCs and STs applicable in the State/UT is given hereunder:-

1. Ad Dharmi
2. Balmiki, Chuhra, Bhangi
3. Bangali
4. Barar, Burar, Berar
5. Batwal, Barwala
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi, Ravidasi, Ramdasia, Ramdasia Sikh, Ravidasia, Ravidasia Sikh
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhila, Gandil Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi, Mazhabi Sikh
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut, Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband
38. Mochi
39. Mahatam, Rai Sikh

Note : There is no Scheduled Tribe notified in the Punjab State

Language and Mother tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate:

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level:

The highest level of education a person has completed.

Work:

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker:

A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.The workers who worked for less than six months during the reference, have been subdivided in two Categories namely, those who worked for less than 3 months and for those who worked for 3 months or more but less than 6 months.

Non-worker:

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator:

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping

orchards or groves, etc. Cultivation does not include the plantation crops like– tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under "other workers".

Agricultural labourer:

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker:

Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker:

A person, who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work participation rate:

Percentage of Workers (Main + Marginal) to total population.

Population density:

Population density is the number of persons inhabited per square kilometer of the area.

Age:

Age is measured in terms of the completed number of years.

Sex Ratio:

Number of females per 1,000 males in a population.

(iii) Non-Census Concepts

Concepts used in VD and TD of DCHB:

1. Educational Amenities:-The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

1.1 Pre-primary (PP): Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from preprimary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

1.2 Primary School (P): Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 Middle School (M): Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

1.4 Secondary School (S): Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 Senior Secondary School (SS): Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. Degree College: (i) **Arts/Science/Commerce** : These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) **Engineering College (E)**: It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

(iii) **Medical Colleges:** These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. Management College/ Institute (MI): It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled: There are Government and Government recognized institutions/organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities:

2.1 Hospital-Allopathic and Hospital-Alternative medicine: A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there is hospitals providing facilities under different systems of medicines such as, Allopathy, Ayuveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b) Ayurveda: Ayurveda means 'Science of life'. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements are represented in the form of Tridosha: Vata, Pitta and Kapha. These three 'doshas' are physiological entities of living beings. Ayurveda developed into eight distinct specialities, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c) Unani: Treatment of Unani consists of three components, namely, preventive, promotive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Artharitis. Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of

health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homeopathy: Treatment in Homeopathy, which is holistic in nature, focuses on an individual's response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homeopathic medicines do not have any toxic, poisonous or side effects. Homeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30- bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3 Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer**.** A PHC covers a population of 20,000 in **hilly**, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4 Primary Health Sub- Centre (PHS): A Primary Health Sub-centre is the first contact point between the primary health care system and the community. As per the population norms, one PHS is **established** for every 5,000 population in plain areas and 3,000 population in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female heath worker.

2.5 Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother **and** child. The services include regular check-up of pregnant women, giving folic tablets, counseling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7 Health Centre: Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8 Dispensary: Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9 Veterinary Hospital: Mostly run by the State Government or local body for treatment and **preventive** measures against diseases of domestic animals like cows, buffaloes etc in rural areas.

2.10 Mobile Health Clinic: These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally **offered** are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counseling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12 Nursing Home: A nursing home is a long –term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies., treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13 Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are **not** taken as medicine shops.

3. Drinking water: The following are the main source of drinking water facility (ies) available in the village.

3.1 Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as 'Tap water from treated source'.

3.2 Tap Water-un-treated: If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as 'Tap water from un-treated source'.

3.3 Covered Well (CW): A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW): A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

3.5 Hand Pump (HP): Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube Well / Borehole (TW): Tube well denotes the ground water source from where ground **water** is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self explanatory.

4. Community Toilet Complex : Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM): It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use: Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid wastes is subjected to decomposition, bio-gas could be produced under favourable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and transport Facilities:

7.1 Post Office (PO): Self-explanatory.

7.2 Sub-Post Office (SPO): Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO): Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph **office** may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self explanatory.**7.6 Mobile Phone Coverage:** Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC): If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of

providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important **cities** within a State and connecting them with NHs or Highways of the neighboring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

7.11 Other District **Roads (ODR):** These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development head quarters or other main roads.

7.12 Village Road: The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13 Black-Topped (Pucca) Road (BTR): A road provided with a bituminous surfacing.

7.14 Gravel (Kuchha) Road (GR): A road constructed using well compacted crushed rock or gravel **material** (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM): This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP): A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: - Banking facility means a place where a person can operate a bank account.

8.1 Commercial Bank (CB): These may be banks wholly owned by the Government of India or by Indian or Foreign Companies.

8.2 Cooperative Banks (Coop. B): A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Cooperative banks are often created by persons belonging to the some local or professional community or sharing a common interest. These banks are registered under the Cooperative Societies Act. The cooperative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949.

8.3 Agricultural Credit Society (ACS): Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery.

8.4 Non-Agricultural Credit Society (NCS): These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities:

9.1 Self-help Group (SHG): Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9.2 Public Distribution System (PDS) shop: The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3 Mandis/Regular Market: These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4 Weekly *Haat*: These are those clusters of shops with or without fixed premises which are open once a week.

9.5 Agricultural Marketing Society: It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.

9.6 Nutrition Centre: Integrated Child Development Services (ICDS): The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7 Anganwadi Centre: Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8 Accredited Social Health Activist (ASHA): ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9 Sports Club/Recreation Centre: Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10 Cinema/Video Hall (CV): If regular cinema houses licensed by Government are available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.

9.11 Public Library: Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12 Public Reading Room: Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13 Newspaper Supply: The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.

10. Availability of Electricity/Power. If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for domestic use: This category includes electricity used only for domestic consumption.

10.2 Power supply for agricultural use: This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power supply for commercial use: This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power supply for all uses: This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern: The land use area of the villages is given in hectares. The land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of drainage : Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of latrines: The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.

(i) Pit System: The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

(ii) Flush/pour flush: A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used). (iii) **Service:** Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under "Others" category.

14. Protected Water Supply- Source and capacity of Storage system: There are various sources of water supply and its storage system in the town.

14.1 Service Reservoir: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for **intake screens**. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank: Tank that is used to ensure consistent water pressure and for storage of water. Usually **located** in basement of house but sometimes (in older settings) located in well pit.

15. Road lighting (Points): Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage: Orphanageis the name to describe a **residential institution** devoted to the **care** of **orphans**–children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a **ward of the state**, and orphanages are a way of providing for their care and housing.

17. **Working women's hostel:** These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. **Old Age Home:** There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. **Stadium:** A stadium is a place, or venue, for (mostly) outdoor **sports**, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall: These are the places where meetings, social functions etc. are organised.

Civic status of urban units:

Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee / Municipal council, Municipality etc.

Size class of U.A./town:

Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population are classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000- 19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cutoff point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 million and above population have been treated as Mega cities and the same criteria of population has been adopted in 2011 census.

(iv) 2011-CENSUS FINDINGS

Population and its distribution:

The following table shows distribution of rural and urban population by tehsils in the district.

Population, Number of Villages and Towns, 2011

Name of Tehsil	Population									No. of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Nihal Singhwala	170,609	90,285	80,324	163,823	86,689	77,134	6,786	3,596	3,190	40	39	1
Bagha Purana	225,649	119,224	106,425	200,443	105,936	94,507	25,206	13,288	11,918	56	56	1
Moga	599,488	316,411	283,077	404,234	213,079	191,155	195,254	103,332	91,922	229	224	3
District total	**995,746**	**525,920**	**469,826**	**768,500**	**405,704**	**362,796**	**227,246**	**120,216**	**107,030**	**325**	**319**	**5**

Moga has a population of 995,746 comprising 525,920 males and 469,826 females. This makes 3.6 per cent of State's population.

Among the tehsils, Moga with a population of 599,488 is the most populous while Nihal Singhwala with a population of 170,609 is the least populous tehsil in the district. The population of other tehsil Bagha Purana is 225,649. In other words, tehsil with the highest population is more than three times bigger than the tehsil having the least population.

In the district 768,500 (77.2%) persons residing in rural and 227,246 (22.8%) in urban areas, the corresponding percentages of rural and urban population in the State are 62.5 and 37.5 respectively. Out of 325 villages of the district, 319 are inhabited. A tehsil on an average has 106 inhabited villages. The rural population is distributed over 319 inhabited villages and the number of these inhabited villages varies between 224 in Moga tehsil and 39 in Nihal Singhwala. The urban population is distributed over 5 towns in the district. An inhabited village in the district on an average has a population of 2,409 as against 1,425 in the state signifying that the villages in Moga district are much bigger in size. Contrary to it, towns are smaller in the district as compared with the State and a town in Moga district on an average has a population of 45,449 against 47,922 in the state.

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the Census organization to classify towns according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian census.

Class	Population size	No. of Towns.
1	2	3
Class – I	100,000 and above (Generally referred to as city)	1
Class – II	50,000 to 99,999	-
Class – III	20,000 to 49,999	1
Class – IV	10,000 to 19,999	2
Class – V	5,000 to 9,999	1
Class – VI	Less than 5,000	-

Moga, the only class I town in the district, accommodates three- forth (71.9%) of the district's urban population. The second big town namely Bagha Purana is in the population size Class-III, this signifies that 83.0 per cent of the urban population of the district is concentrated in these two towns, there is no town under class II, two town falls in the population size class IV and one town falls in the population size class V. There is no town under Class-VI, the share of class III, class IV and class V is 11.1, 8.4, 5.6 and 3.0 per cent respectively.

During this decade the number of towns has gone up from 4 in 2001 to 5 in 2011. There has been an addition of one Census Town viz. Kot Ise Khan with a population of 12,800, which is nearly 5.6 per cent of the urban population of the district. Among the towns in the district, Moga (UA) 163,397 is the most populous while Badhni Kalan (NP) with 6,786 is the least populous town in the district.

Population Growth, Density and Sex Ratio

Population Growth:

During 2001-2011, population of Moga has increased from 894,854 in 2001 to 995,746 resulting in a net addition of 100,892 persons during this decade. In percentage terms the district has recorded a decadal growth rate of 11.3 per cent which is lower than that of state average (13.9%). Moga district has a population of 995,746 including 525,920 males and 469,826 females.

Density:

Moga with a population 995,746 and area of 2242sq.km. has a density of 444 persons per sq km, which is significantly lower than that of the State 551and ranks 14th among the districts in the state badly excelled by Ludhiana 978 and Amritsar (928) districts.

Within the district, Moga (486) is the most densely populated tehsil and Bagha Purana (385) is the least populated tehsil. Likewise, rural density varies between 338 in Moga and 345 in Bagha Purana tehsils. The urban density is the highest in Moga tehsil (4,851) and the lowest in Nihal Singhwala tehsil (1,996).

Sex Ratio:-

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors, which determine the sex composition. It reflects the socio-economic and demographic characteristic of the population and unfolds the status of women in the society and care of the girl child in particular.

Significant feature of Punjab population is the preponderance of males over females. According to Census 2011, out of the total population of 27,743,338 in the State, 14,639,465 are males and 13,103,873 females resulting an overall sex ratio of (895) which is significantly lower than the country as a whole (943). All the districts in the state barring Hoshiarpur (961), SBS Nagar (954), Jalandhar & Rupnagar (915), Kapurthala (912) and Tarn Taran (900) have a sex ratio of less than 900.

In fact the sex ratio in the State and its constituent districts has remained to be low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901, which

declined to 780 in 1911. Ever since, the sex ratio in the state, showed gradually improvement till 1991, when it reached 882. However, it has declined to 876 in 2001. During 2011, it has increased to 895, exhibiting a rise of 19 points in the State.

Within the State the districts among themselves show considerable disparity which is the highest in Hoshiarpur district (961) and the lowest in Bathinda (868). Moga district with a sex ratio of 893 is slightly lower than that of state average.

Among the tehsils in the district the sex ratio is the highest in Moga (895) and the lowest in Nihal Singhwala (890). The rural sex ratio varies between 897 in Moga and 890 in Nihal Singhwala tehsils and the corresponding figures in the urban sex ratio is 897 in Bagha Purana and 887 in Nihal Singwala.

The Child sex ratio is reported to be the highest in SBS Nagar district (885) and the lowest in Tarn Taran (820) signifying that child sex ratio is appalling low in all the districts in the state. All the 20 districts which exhibit a child sex ratio of over 800.

Likewise, the disparity in the rural and urban child sex ratio is quite marked; the rural child sex ratio varies between 867in Moga and 863 in Nihal Singhwala while the variation in urban child sex ratio is to the extent of 859 in Moga and 743 in Nihal Singhwala.

Literacy:

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates. 75.8 per cent of the state's population is literate which is higher than that of the country (73.0%) as such. Among the States /Union Territories, Punjab ranks 22nd in terms of literacy. In Moga district 70.7 per cent of the population is recorded as literate, which is significantly lower than the state as such. It ranks at 12th among the districts in the State. Among the tehsils in the district, Moga (72.4%) ranks at the top while Bagha Purana (67.6%) is placed at the bottom. However, all tehsils except Moga in the district have literacy rate lower than the overall literacy rate in the state.

Between the two sexes, the gap in the literacy rate among males and females in the district is almost at par with the state. In Moga district 74.4 per cent among males and 66.5 per cent among females are literate, while the corresponding figures for the State are 80.4 and 70.7 per cent respectively.

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district; 68.2 per cent of the rural population and 78.9 per cent of the urban population is literate. The urban literacy is higher than the rural in all the tehsils and the gap in rural- urban literacy rate is the widest in Moga (urban 79.3 % and rural 69.0 %) and the narrowest in Bagha Purana (urban 76.1 % and rural 66.5 %).

Work Participation Rate:

Definition of Work and Classification of Workers:-

Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the

Census of India 2001, which includes production of milk even for domestic consumption. In the 1991 Census cultivation of certain crops even for one's self-consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes, all types of flowers, fruits and tuber potatoes, chilies and turmeric, viper, cardamoms, vegetables etc, in other words plantation of tea, coffee, rubber, coconut and betel nuts have been classified under plantation and not included in cultivation.

For the Ist time in Census 2011, the marginal workers i.e workers who worked for less than six months during the reference, have been subdivided in two Categories namely, those who worked for less than 3 months and for those who worked for 3 months or more but less than 6 months.

For non economic activity: A category of 'others'has been included to account for commercial sex works and persons involved in illegal activities. A new code for 'rentier' has also been introduced.

The reference period for recording the economic activity of any person is preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last year are recorded as main workers while those who had worked for less a six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, Household Industries and Other workers.

Punjab, with a work participation rate of 35.7 per cent, ranks 27th among the States/Union Territories in the Country and thus, the work participation rate in the State is lower than that of India (39.8%). Among the districts in the State, the proportion of workers varies between 42.7 per cent in Mansa district and 31.5 per cent in Hoshiarpur district. In all, 10 out of 20 districts in the State have shown work participation above the state average. 5 districts namely Mansa, Amritsar, Jalandhar, Firozpur and Kapurthal have recorded an increase in .W.P.R during 2001-2011.

Main Workers and Marginal Workers:

85.4 per cent of Punjab's total workers have been recorded as Main Workers and 14.6 per cent as Marginal Workers. The corresponding figures for 2001 Census were 85.8 per cent and 14.2 per cent respectively. In Moga district the per cent of main workers and marginal workers is 84.9 and 15.1 per cent to the total worker respectively. Significantly work participation rate (main+ marginal) in Moga (36.1%) is less than the state average (35.7%).

Among the tehsils in the district, it varies between 36.3 per cent in Nihal Singhwala and 35.7 per cent in Moga and for that of marginal worker it varies between 6.7 per cent in Bagha Purana and 4.8 per cent in Moga tehsil. In the district 55.6 per cent among males and 14.2 per cent among females are reported as workers showing a significant reduction in the gap between both.

Religion

It has been customary for the Indian Census to provide information on religious persuasions of its people. Religion is one of the basic cultural characteristics of population

and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and useful to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. Question 7 of the household schedule canvassed during the 2011 Census pertained to religion. The instructions to enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes in 2011:-

Religion		Code
Hindus	-	1
Muslims	-	2
Christians	-	3
Sikhs	-	4
Buddhists	-	5
Jains	-	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Out of 995,746 persons in Moga district, there are 158,414 (15.9%) Hindus and 818,921 (82.2%) are Sikhs. Population of other communities recorded as 365 which is negligible. Regarding percentage of Sikh population Moga district ranks at the 9th position among all districts of Punjab.

(c) Mother Tongue

Question 10 of the Household Schedule canvassed at the 2011 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Question 11 of the Household Schedule was aimed to collect information on 'Other Languages known' (up to two languages in order of proficiency) other than Mother Tongue.

Scheduled Castes and Scheduled Tribes

Out of the total population of 2,77,43,338 in the state 88,60,179 belong to Scheduled Castes as per 2011 Census. As such 31.9 per cent of the state's population and 36.5 per cent of the population in the district belong to Scheduled Castes. Among the tehsils, it is the highest in Nihal Singhwala (40.3%), and the lowest in Moga (35.2%). The proportion of Scheduled Castes population in Bagha Purana (37.1 %) is nearer to the district average (37.5 %).

In consonance with the general trends in the state, Scheduled Castes are recorded more in rural area by residence as 73.3 per cent of Scheduled Castes population in the State and 84.5 per cent in the district are rural by residence.

In the district 40.0 per cent of population in rural areas belongs to Scheduled Castes while the corresponding percentage in urban areas is 24.8 per cent. In Nihal Singhwala tehsil Scheduled Castes comprise a little less than two-fifth (40.3%) of rural population and this percentage is the highest among all the tehsils in the district. The proportion of Scheduled Castes population residing in urban areas varies between 23.8 per cent in Moga tehsil and 31.0 per cent in Bagha Purana tehsil.

During the 2001-2011 Scheduled Castes population in the state has increased by 26.1 per cent which is less than that of Moga (27.5%). In the district 55.2 per cent of the Scheduled Castes population is literate which is lower than that of the state (56.2 %.), 59.3 per cent in rural areas and 62.0 per cent in urban areas in Moga are literate.

There are no Scheduled Tribes in Punjab State.

(v) Brief Analysis Based on Primary Census Abstract

TABLE 1: DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 2001-2011

Serial number	Tehsil	Population						Percentage decadal variation 2001-2011			Percentage urban population	
		2001			2011						2001	2011
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Nihal Singhwala	156,455	150,089	6,366	170,609	163,823	6,786	**9**	**9.2**	**6.6**	**4.1**	**4**

3	Moga	533,253	382,575	150,678	599,488	404,234	195,254	**12.4**	**5.7**	**29.6**	**28.3**	**32.6**
District Total		**894,793**	**716,153**	**178,640**	**995,746**	**768,500**	**227,246**	**11.3**	**7.3**	**27.2**	**20**	**22.8**

Table 1 shows tehsil wise population for total, rural and urban areas of the district. During 2001-2011 Moga district recorded a growth rate of 11.3 per cent as against 13.9 per cent for the state. Among the tehsils, it varies between 12.4 per cent in Moga and 9.0 per cent in Nihal Singhwala. Besides Nihal Singhwala, the decadal growth rate of Bagha Purana (10.0 per cent) is also below the district average.

The urban population in the district grew by 27.2 per cent which is higher than that of the rural (7.3%) growth rate. Moga tehsil has recorded an urban growth rate of 29.6 per cent, which is higher than Bagha Purana (16.7 %) and Nihal Singhwala (6.6 %). Rural growth rate varies between 9.2 per cent in Nihal Singhwala and Bagha Purana respectively and 5.7 per cent in Moga.

22.8 per cent of the population in the district is urban as against 20.0 per cent in 2001. The level of urbanization in the district however, is much below the average of state (37.5 %). The percentage of urban population to total population has increased from 28.3 per cent to 32.6 per cent in Moga Tehsil and 10.5 per cent to 11.2 per cent in Bagha Purana in 2011 but in Nihal Singhwala tehsil it decreased (only point 0.1 %) from 4.1 per cent to 4.0 per cent.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2011

Sl. No	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Out of 325 villages in the district, 6 are uninhabited comprising one in Nihal Singhwala tehsil and Five in Moga tehsil. A village on an average has a population of 2,409 in the district, the corresponding size of an inhabited village in the State, as a whole is 1,425. The inhabited villages (319) are distributed over 6 CD blocks(5 CD blocks of Moga district and one of Firozpur district) in the district, on an average a CD block has 53 inhabited villages and population of 128,083 whereas total villages of the state are distributed over 142 CD blocks. In the state a CD block has 89 inhabited villages and population of 122,142. Evidently, the inhabited villages in Moga district are smaller in population size as compared to the State. Among these 319 inhabited villages, 25(8 %) villages have a population of less than 200, 39(12.0%) fall in the population size Class of 200-499,48(15%**)** in the range of 500-999, 72(23 %) in the range of 1,000-1,999, 92 (29%) are having population varying between 2,000-4,999, 37(12 %) between 5,000 – 9,999 and the remaining 6 (2%) villages have a population of 10,000 and above. In other words 112 villages are in small size with a population of less than 1,000 and they contain 6.9 per cent of the rural population of the district, 164 are medium sized having population 1,000–4,999 and they contain 51.8 per cent of rural population of the district, 43 villages in the district are large sized having population 5,000 and above and they contain 41.3 per cent of the rural population of the district. Among them 6 are exceptionally large sized villages falling in the population range of 10,000 and above and they accommodate 8.4 per cent of the district rural population

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2011

Sl. No.	Name of Town	
(a) New Towns		
(i) Statuary town		**Nil**
(ii) Census town	**Kot Ise Khan**	**CT**
(b) Denotified		
(i) Statutory town of 2001 Census denotified which did not satisfy the criteria to be treated as towns	**Nil**	
(ii) Statutory towns of 2001 census denotified but identified as census towns based on demographic and economic criteria	**Nil**	
(iii) Census towns of 2001 census are notified as statutory town in 2011 census	**Nil**	
(C) Declassified	**Nil**	
(d) Wholly merged with other town (s)		**Nil**

*Declassified means the census town of 2001 census which failed to satisfy the demographic and economic criteria .

Table 3 exhibits new tables added, denotified, declassified and merged towns in the districts at 2011 Census. There are 4 Towns and one new Census town Kot ise khan in the district Moga. Further, in the district, no towns of 2001census has ben denotified and merged.

TABLE 4 : Sex ratio of State and District, 1901-2011

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	837	798	NA	NA	891
1911	780	785	740	NA	NA	852
1921	799	808	735	NA	NA	666
1931	815	832	721	NA	NA	733

1951	844	854	807	867	867	862
1961	854	865	817	862	862	864
1971	865	868	856	866	863	884
1981	879	884	865	881	880	888
1991	882	888	868	884	883	889
2001	876	890	849	887	888	884
2011	895	907	875	893	894	890

Note : Sex Ratio has been defined as number of females per 1000 males.

Sex Ratio reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in society and the care for the girl child in particular. Unfortunately, in consonance with the overall patterns of the State, the sex ratio in the district has remained low in all censuses except in 2011. The sex ratio declined from 832 in

1901 to 780 in 1911 in the state. Ever since 1911, the sex ratio showed a gradual improvement, uninterruptedly, till 1991 when it reached 882.but decline by 6 points in 2001 During 2001-2011, the sex ratio in Punjab has raise by 19 points, from 876 to 895.

The population census data are not available for Moga district prior to 1951 Census. Moga district had a sex ratio of 867 in 1951, which increased 881 in 1981, and improved 884 in 1991 and 887 in 2001 and 893 in 2011 the sex ratio of the district remains higher than the sex ratio of the state during 1951-2001 but decline by 2 points in 2011. In the state, the urban sex ratio has declined from 868 in 1991 to 849 in 2001 and raise to 875 in 2011, while the corresponding increase in the urban sex ratio of the district is from 884 to 890 during 2001-2011. The rural sex ratio in the state has increased by17 points from 890 in 2001 to 907 in 2011, while in the district it has shown 6 points increase from 888 to 894 during this decade.

Table 5: Sex ratio by Sub-district, 2011

Sr.No.	Name of Sub-district	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	00231-Nihal Singhwala	890	890	887
2	00232-Bagha Purana	893	892	897
3	00233-Moga	895	897	890
	District: 042-Moga	**893**	**894**	**890**

Sex ratio by tehsils is shown in table 5. The sex ratio of the district is revealed as 893 while it is 894 for rural and 890 for urban.

Among the tehsils, the sex ratio varies between 895 in Moga and 898 in Nihal Singh wala. The rural sex ratio varies between 897 in Moga and 890 in Nihal Singh wala tehsils, and the urban sex ratio varies between 887 in Nihal Singh wala and 897 in Baghapurana tehsils. The sex ratio in all three tehsils is above the state average (875) in urban areas whereas it is below state average (907) in three tehsils in rural areas.

Table 6: Sex ratio by CD Blocks, 2011

Sr.No.	Name of CD block	Sex ratio
1	2	3
1	0064-Dharamkot	901
2	0065-Moga-I	898
3	0066-Moga-II	890
4	0067-Baghapurana	891
5	0068-Nihal Singhwala	890
6	0070-Zira	885
	Total	**894**

Table 6 exhibits C.D. blockwise sex ratio in the district. Among the CD blocks rural sex ratio varies between 901 in Dharamkot and 885 in Zira. In all, two CD blocks show rural sex ratio above and four below the rural sex ratio of district (894). One of the CD block Dharamkot crosses 900 mark.

Table 7: Sex ratio of rural population by ranges, 2011

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2011	Percentage distribution of population
1	2	3	4	5
Less than 700	6	1.88	504	0.07
700 - 749	1	0.31	80	0.01
750 - 799	2	0.63	915	0.12

1000 - 1099	9	2.82	1980	0.26
1100+	3	0.94	787	0.1
District: Moga (042)	**319**	**100**	**768500**	**100**
Sex ratio District (Rural):	894			

Sex ratio of rural population by ranges is portrayed in Table 7. The district as such is marked with a relatively low sex ratio (894). In 9 villages Sex Ratio is less than 800. The villages with low sex ratio comprise 2.82 per cent of the total villages in the district and contain 0.2 per cent of district rural population. 24 villages (7.52 per cent) are marked with a rural sex ratio of 800-849 and they contain 4.10 per cent of the district rural population.

The maximum number of 142 villages exhibits a rural sex ratio in the range of 850-899. These make 44.51 per cent of the total villages and have three-fifth (59.53%) of the rural population of the district.

As many as 103 villages are marked with a high sex ratio of 900-949 and they constitute 32.29 per cent of the total villages and account for 32.28 per cent of the population. Male-Female ratio is quite close to parity in the range of 950-1099 in 38(11.91 %) villages having 3.79 per cent of the rural population of the district.

Table 8: Sex ratio of towns, 2011

Sr.No.	Name of town	Urban status of town	Sex ratio
1	2	3	4
1	800200-Badhni Kalan (NP)	(NP)	887
2	800201-Bagha Purana (M Cl)	(M Cl)	897
3	800202-Moga (M Cl + OG)	(M Cl + OG)	887
4	800203-Dharamkot (M Cl)	(M Cl)	903
5	034220-Kot Ise Khan (CT)	(CT)	907
	Sex ratio (Urban) district:		**890**

Sex ratio of urban agglomerations/towns is exhibited in Table 8. The district has an urban sex ratio of 890, which is higher than the urban sex ratio of the State (875).

Among the UAs/ towns, the sex ratio varies between 907 in Kot Ise Khan and 887 in Badhani Kalan and Moga. In all, as many as 3 towns have sex ratio higher than that of the district and Badhani kalan and Moga town have sex ratio below the district average

Table 9: Sex ratio of population in the age group 0-6 for Sub-district, 2011

Sr. No.	Name of Sub-district	Total/ Rural/ Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

		Urban	**24722**	**13343**	**11379**	**853**

Sex ratio in 0-6 population by tehsils exhibited in table 9. The district has a sex ratio 860 while it is 863 in rural and 853 in urban areas. In urban area sex ratio in 0-6 population is highest in Moga (859) and lowest in Nihal Singh wala (743). In rural area it is highest in Moga (867) and lowest in Bagha Purana (853).

Table 10: Sex ratio of population in the age group 0-6 for CD Blocks, 2011

Sr. No.	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age group

Table 10 shows CD Blockwise sex ratio of population in the age group 0-6 termed as child sex ratio.The gap in the child sex ratio in rural areas (863) and the over all rural sex ratio (894) in the district is alarming; showing a gap of 31 points between the two. This is a cause of great concern and looks for possible remedial measures in bridging the gap between the two and also in improving the prevailing low levels of sex ratio. More so, four CD blocks viz. Bagha Purana (852), Dharmkot (853) are marked with a child sex ratio even lower than the district average. Nihal Singhwala (865), Moga-II (873) and Moga-I (880), Zira (1667) are the four CD blocks crossing district average (863).

Table 11: Sex ratio of rural population in the age group 0-6 by ranges, 2011

District: Moga (042)	**319**	**100**	**82614**	**100**

Sex ratio District (Rural):863

Table 11 shows the sex ratio of rural population in the district in different ranges.The district (Rural) is marked with a very low sex ratio (863). 47 (14.73 %) villages are marked with an excessively low child sex ratio of less than 700. Together these villages constitute 3.70 per cent of the child population in age group 0-6 in rural areas of the district. The sex ratio is equally low in the range of 700-749 in 28 (8.78%) villages constituting 8.17 per cent of the district's child population. Another 34(10.66%) villages fall in the range of 750-799 and they contain (13.00 %) of the rural child population of the district.

210 (out of 319) villages which make a little more than one-half (65.8%) of the villages and contain 75.2 per cent of child population have crossed 800 mark. Among, them 35(10.97%) fall in the range of 800-849 and cover 13.59 per cent of district rural child population. Another 55 (17.24%) villages having 23.37 per cent of child population are in the range of 850-899. The rural child sex ratio is fairly high in the range of 900-949 in 48 (15.5 %) villages containing 23.24 per cent of the child population, and another 20 (6.27 %) villages having 7.55 per cent of the population display a very high sex ratio of 950-999.

As many as 52 villages in the district are female biased and all of them fall in the range of 1000-1100 + and make 16.3 per cent of the total villages and share 7.38 per cent of the rural child population of the district.

Table 12: Sex ratio of population in the age group 0-6 of towns, 2011

	District (Urban): 042-Moga		**24722**	**13343**	**11379**	**853**

Table 12 shows sex ratio of child population in the age group 0-6 of urban agglomerations/towns in 2011. Urban child sex ratio in the district (853) is significantly lower than the overall urban sex ratio (890) and ranks 11th among all the districts in the state. The

urban child sex ratio in Badhni Kalan (743) is very poor than that of the District (853), although it is quite low in itself.

Among the towns in the district, Child sex ratio is highest in Kot Ise Khan (888) and the lowest in Badhani Kalan (743). As many as 2 towns viz. Bagha Purana (839) and Dharamkot (835) show urban child sex ratio lower than that of the district (853). Besides Moga (859) also stands parallel to the district average.

Table 13: Number and percentage of scheduled castes and scheduled tribes population in Sub-districts, 2011

		Urban	**227246**	**56319**	**0**	**24.78**	**0**

Table 13 shows 36.5 per cent of the population in the district belongs to Scheduled Castes as compared to 31.9 per cent in the State. Among the tehsils, it is the highest in Nihal Singhwala (40.27%) and the lowest in Moga (35.2 %). The proportion of Scheduled Castes population in Nihal Singhwala and Bagha Purana is higher than that of the district average (36.5%).

In consonance with the general trends in the State, Scheduled Castes population is more in rural areas by residence than urban areas. In rural areas of the district the highest percentage of Scheduled Castes has been observed in tehsil Moga (40.71%) while the lowest in Bagha Purana (37.86%).There is no notified Scheduled Tribe population in the State.

Table 14: Number and percentage of scheduled castes and scheduled tribes (rural) population in CD Blocks, 2011

Table 14 gives CD block wise distribution of Scheduled Castes population in the district. Population of Moga district is spread over in six CD blocks.

The CD blocks among themselves exhibit spatial disparities in the proportion of Scheduled Castes population. It is the maximum in Dharamkot (42.11%) and is closely followed by Nihal Singhwala(41.24), Moga-II (40.64%). In all 3 CD blocks reveal percentage higher than the district average 39.96% and two CD block Bagha purana (36.77%) and Moga I (39.82%) CD blocks fall below the district average and CD block Zira has no SC population.

Table 15: Proportion of scheduled castes population to total population in villages, 2011

Percentage range of scheduled castes population to total population	Number of villages	Percentage	Scheduled castes population	Percentage

District: Moga (042)	**319**	**100**	**307098**	**100**

Table 15 presents proportion of Scheduled Castes population in villages by ranges. 14 (4.39%) villages in the district do not have any Scheduled Castes population and in another 5 (1.57%) villages Scheduled Castes comprise 0.02 per cent of the total population. Yet another 7 (2.19%) villages have Scheduled Castes population in the range of 5-10 per cent and they contain only 0.11 per cent of the Scheduled Castes population of the district. All these 26 (8.15%) villages together make 0.13 per cent of the total population.

24 (7.52%) of the villages fall in the range of 11-20 per cent and they account for 1.13 per cent of the Scheduled Castes population of the district. 44 (13.78%) villages have Scheduled Castes population in the range of 21-30 per cent and 8.69% of the scheduled caste population .

84 (26.33%) villages having 31.27 per cent of the district's rural Scheduled Castes population exhibit a relatively high proportion of Scheduled Castes population in the range of 31-40 per cent and another 85 villages which comprise 26.65 per cent of the total villages and 40.91 per cent of rural Scheduled Castes population of the district fall in the range of 41-50 per cent.

Further more 43 villages fall in the range of 51-75 per cent comprising 13.48 per cent of the total villages and 15.53 per cent of rural Scheduled Castes population of the district. 13(4.08%) of the villages fall in the range of 76.0 per cent and above having 2.34 per cent Scheduled castes population of the district.

Table 16: Proportion of scheduled tribes population to total population in villages, 2011

Percentage range of scheduled tribes population to total population	Number of villages	Percentage	Scheduled tribes population	Percentage

	District (Urban) : 042-Moga	**227246**	**56319**	**0**	**24.78**	**0**

Table 17 gives the number and percentage of scheduled castes population to total population in Urban Agglomeration/Towns.

In urban areas Scheduled Castes comprise about one-forth (24.78 %) population of the district as shown in Table 17 which is slightly better than the state (22.7%). The towns among themselves show wide disparity in this regard. In Bagha Purana 31.02 per cent of the population belongs to Scheduled Castes, while in Kot ise khan this percentage is barely 27.06 per cent.

There is no scheduled tribe in the state of Punjab.

Table 18: Sex ratio among scheduled castes and scheduled tribes (rural) in CD Blocks, 2011

Sr.No.	Name of C.D.block	Scheduled castes sex ratio	Scheduled tribes sex ratio
1	2	3	4

2	800201-Bagha Purana (M Cl)	892	0
3	800202-Moga (M Cl + OG)	888	0
4	800203-Dharamkot (M Cl)	897	0
5	034220-Kot Ise Khan (CT)	915	0
	District (Urban): 042-Moga	**890**	**0**

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table19 shows that Scheduled Castes population in urban areas of the district has a sex ratio of 890 which Surpasses the district Ludhiana (879) and Fatehgarh Sahib (878). The situation is also quite encouraging in Kot Ise Khan(CT) with maximum sex ratio of 915 . Two Towns Dharamkot (MCl) 897 and Bagha Purana MCl 892 shows the scheduled caste sex ratio above the district average while Badhani Kalan(NP) 858 and Moga (MCl) 888 shows below district average Amazingly, only one town Kot Ise Khan (CT), cross 900 mark.

Table 20 reveals that 70.68 per cent of the district's population is literate compared with 75.8 per cent in the state as such. District shows little less literacy rate than State.

Moga (72.35%) is the most literate tehsil in the district and exceeds the district average also. By contrast, Bagha Purana (67.59 %) with more than one-half of its population as literate is placed at the bottom. However, none of the tehsils in the district has literacy rate exceeding the overall literacy rate of the State.

Between the two sexes, the literacy rate in the district varies between 74.44 per cent among males and 66.48 per cent among females, exhibiting a gap of 7.96 percentage points. The male-female differential is the widest (8.52 percentage points) in Nihalsinghwala tehsil (males 72.94 % and females 64.42%) and the narrowest (7.97 percentage points) in Moga tehsil (males 76.12 % and females 68.15 %).

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district; 68.23 per cent of the rural population and 78.95 per cent urban population is literate. The urban literacy is higher than the rural in all the tehsils and the gap in rural- urban literacy rate is the widest in Moga (urban- 79.33% and rural 68.97%) and the narrowest in Bagha Purana (urban- 76.13% and rural 66.52%). But rural 68.23 and urban 78.95 literacy rates of district fail to excel the rates of the state rural 71.4 and urban 83.2.

Table 21: Number of literates and illiterates, literacy rate by sex in CD Blocks (rural), 2011

	Total	**468003**	**260725**	**207278**	**300497**	**144979**	**155518**	**68.23**	**72.15**	**63.87**	**8.28**

Rural areas of the district are marked with a relatively low literacy rate as can be seen from Table 21. More than one-half (68.23%) of the ruralites in the district are literate compared with (78.9%) per cent in urban areas. Among the CD blocks, the rural literacy rate highest 73.33 per cent in Zira and 71.28 % in Moga –I with second highest and least in Bagha purana with 66.64 per cent. Besides Nihal Singhwala (68.89 %), Moga-II (66.83%) and 67.82 in Dharamkot.

In all the C.D. blocks a little more one- half of their population is literate and male-female gap is 8.28 percentage points in district and the maximum 9.55 percentage points in Dharamkot C.D. Block.

Table 22: Distribution of villages by literacy rate range, 2011

District (Urban): Moga(042)		**159886**	**87824**	**72062**	**67360**	**32392**	**34968**	**78.95**	**82.18**	**75.34**	**6.84**

Table 23 reveals that 78.95 per cent of the urban population in the district is literate. Among the towns, the literacy rate varies between 80.1 per cent in Moga (MCl +OG) and 74.9 per cent in Dharamkot (MCl). In all, one town i.e. Moga has literacy rate higher than the district average and as many as 4 towns fall below the district average.

Between the two sexes, 82.18 per cent among males and 75.34 per cent among females are literate. Likewise in urban, male literacy rate is the highest in Moga (83.26 %) and the lowest in Dharamkot (78.53%). This is so in case of female literacy too; it is the highest in Moga (76.55%) and the lowest in Dharamkot (70.93). Besides Dharamkot, the female literacy rate is lower than district average in Badhni Kalan (74.89%), Bagha Purana (72.67 %) and Kot Ise Khan (71.92%).

Male-Female literacy rate in urban areas shows a sizeable gap of 6.84 percentage points. This gap is the maximum (7.8 percentage points) in Kot Ise Khan. On the other hand this gap is relatively the narrowest in Badhni Kalan (6.51 percentage points).

Table 24: Number of scheduled castes literates and illiterates, literacy rate by sex in CD Blocks, 2011

Table 24 shows the number and percentage of scheduled castes literates and illiterates by sex in CD blocks.

Scheduled Castes population in rural areas in the district has a literacy rate of 54.92 per cent compared with an overall rural literacy rate of 68.23 per cent in the district. Moga-I (58.43 %) , Nihal Singhwala (56.38 %) and Dharamkot (55.07%) are three CD blocks which

have literacy rate above the district average.In rural, scheduled castes literacy rate is the lowest in Moga-II (51.69%) and Bagha Purana (52.67%) which is below district average.

Nearly one-half (59.35 %) of the males and a little lesser than one-half (49.92%) of the scheduled castes females in the district are literate. Among the CD blocks male literacy rate varies between 63.26 per cent in Moga-I and 54.9 per cent in Moga-II.

Likewise the scheduled castes female literacy shows wide variations; it is the highest (52.98%) in Moga-I and the lowest (48%) in Moga-II.

Male-female Scheduled Castes rural literacy rates show a gap of 9.43 percentage points in the district, and among the C.D. blocks this gap is to the extent of 11.4 percentage points in Dharamkot and 6.9 per cent in Moga-II.

Table 25: Distribution of villages by literacy rate range for scheduled castes population (rural), 2011

Total	**305**	**100.00**	**307098**	**100.00**
District Scheduled castes Literacy rate:	**54.92**			

Table 25 shows the distribution of villages by ranges of literacy rate for scheduled castes population.16 villages which make 5.25 per cent of the total villages and share 0.9 per cent of district's Scheduled Castes population fall in the range of 40 per cent or less. Another 66 villages which constitute 21.64 per cent of the total villages and 21.11 per cent of the district's Scheduled Castes population have literacy rate in the range of 41-50 per cent. All these villages are experiencing very low level of literacy in Scheduled Castes population.

The maximum number of villages 150 (49.18%) villages comprising 62.53 per cent of population fall in the range 51-60. 61 Villages which make 20 per cent of the total villages and 13.92 per cent Scheduled Castes population fall in the range of 61-70.

Another 11 villages which constitute 3.61 per cent of the total villages and 1.53 per cent of the district's Scheduled Castes population have literacy rate in the range of 71-80 per cent. 1 village which makes 0.33 per cent of the total villages and 0.00 per cent Scheduled Castes population fall in the range of 81-90 per cent.

Very high Scheduled Castes literacy rate of more than 80 per cent is noticed in 1(0.33%) village only. However, its share in Scheduled Castes population of the district is negligible.

Table 26: Number of scheduled castes literates and illiterates, literacy rate by sex in towns, 2011

	District: Moga (042)	**27739**	**15947**	**11792**	**28580**	**13847**	**14733**	**56.92**	**61.96**	**51.29**	**10.67**

The table 26 shows the number and percentage of scheduled castes literate and illiterate by sex in towns. A more than one-half (56.92%) Scheduled Castes population in urban areas of the district is literate. Among the towns it is the highest in Badhni Kalan (61.07 %) and Bagha Purana (57.37 %) is the second highest.

By contrast, urban Scheduled Castes literacy rate is lowest in Kot Ise Khan (52.46%) and followed by Dharamkot (54.25 %). 61.96 per cent Scheduled Castes males and 51.29 per cent females in urban areas are literate reflecting a gap of 10.67 percentage points between the two. Male-female disparity in this regard is quite conspicuous. Among the towns Scheduled Castes male literacy rate varies between 63.73 per cent in Badhani Kalan and 56.16 per cent in Kot Ise Khan, while the corresponding percentage among females is 58.05 per cent in Badhni Kalan and 48.03 per cent in Dharamkot.Further more, male-female differential in Scheduled Castes literacy rate is the maximum in Dharamkot (11.89 percentage points) and the minimum in Badhni Kalan (5.68 percentage points).

Table 30 shows that the work participation rate in Moga district (36.07%) is comparatively higher than the state average (35.7%).Among the tehsils it varies between (36.96%) in Bagha Purana and (35.67%) in Moga. In the district 55.59 per cent among males and 14.22 per cent among females are reported as workers. Out of the total population in the district, 30.62 per cent are main workers and 5.45 per cent are marginal workers and 63.93 are non workers. The proportion of main workers is highest in Moga (30.83 per cent) and the lowest (30.28 per cent) in Nihal Singhwala tehsils. Similarly, the proportion of marginal workers is highest (6.66 per cent) in Bagha Purana and the lowest (4.84 per cent) in Moga tehsils. Further; the proportion of female marginal workers is lesser by 4.58 per cent and males marginal workers 6.23 per cent in the district.it was higher in 2001 data, but in 2011 census it declines. By and large, a similar pattern is observed among all the tehsils in this regard. Bagha Purana 5.29 per cent of females are marginal workers as against 7.88 per cent among male counterparts.. In Nihal Singhwala tehsil, 5.20 and Moga 4.15 per cent have proportion of female marginal workers declines as compared to 2001 census.The work participation rate (main + marginal) in Moga district (36.07 per cent) is better than the State average (35.7 per cent). Among tehsils, it varies between 36.96 per cent in Bagha Purana and 35.67 per cent in Moga.

Moga district shows 36.07 per cent mark regarding total workers and 55.59 percent male workers 14.22 per cent mark regarding female workers showing a significant reduction in the gap between the two. In Bagha Purana tehsil (16.43 per cent) of the females are recorded as workers and this percentage is highest among all the tehsils in the district.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at CD block level. It is observed that 35.73 per cent of the rural population in the district is working, out of which 29.92 per cent are main workers and 5.81 per cent are marginal workers. This percentage is approximately equal that of the state where 35.6 per cent of the rural population is reported as workers out of which 29.4 per cent are main workers and 6.18 per cent are marginal workers. Among the CD blocks, the work participation rate varies between 37.6 per cent in Bagha purana and Moga-I 33.61 per cent.

The percentage of main workers is highest in Zira C.D. block (35.71 per cent) and the lowest in Moga-I (29.11 per cent). However, the proportion of marginal workers is the maximum in Bagha Purana CD block (7.62 per cent) and the minimum in Moga-II (3.58 per cent) and 0 per cent in Zira CD Block.Punjab State, in general is characterised by low female work participation rate. It was the lowest 4.4 per cent among all the States/Union Territories in the country in 1991 Census. It was more due to non-reporting of female's work by the respondents. it raised to 19.1 in 2001 but in 2011 again declines by 6 points and become 13.9.Percentage of Moga district shows 13.69 % female work participation rate (almost identical to State) comprising 8.89 per cent main workers and 4.80 per cent marginal workers. Among the C D blocks the Female work participation rate varies between 16.60 per cent in Bagha Purana and 2.17 per cent in Zira (P).

Table 32 gives the number and percentage of main workers, marginal workers and non- workers by sex in urban Agglomerations/Towns.The work participation rate in urban areas of the district (37.22 per cent) is more than that of the State (35.8 per cent). Among the towns in the district, the participation rate is highest in Moga MCl (38.15 per cent) and the lowest in Badhani kalan(NP) (32.73 per cent) as is evident from Table 32. Out of 5 towns one Moga MCl falls above and four below the district average. The participation in marginal work is comparatively much less. In the district 4.23 per cent of the urban population is reported as marginal workers compared with 32.99 per cent main workers. The percentage of population reported as marginal workers shows a variation of 4.88 per cent in Moga (MCl) and 2.02 per cent in Dharamkot. The corresponding proportion of main workers varies between 33.89 per cent in Bagha Purana and 29.33 per cent in Kot Ise Khan.

The urban female work participation rate in the district is 16.01 per cent compared with 56.10 per cent among males. Among the towns it is highest in Moga(MCl) 17.26 per cent and the lowest in Badhani Kalan (N.P) 7.84 per cent. In all, female work participation rate is more in one town namely Moga (MCl) than the urban female participation rate of the district which is 16.01.

Table 33 shows distribution of workers by sex in four categories of economic activity by Subdistrict in the district. Among the total workers in the district, 25.51 per cent are cultivators, 22.94 per cent agricultural labourers 5.04 per cent household industry workers and 46.51 per cent reported as other workers.

This signifies that 48.45 per cent of the total workers in the district are engaged in agricultural sector, while 51.55 per cent are in non-agricultural sector of economy. Among tehsils, the percentage of cultivators is the highest in Nihal Singhwala (31.04 per cent) and the lowest in Moga (22.22 per cent). Likewise, the proportion of workers reported as agricultural labourers varies between 29.15 per cent in Nihal Singhwala tehsil and 19.32 per cent in Moga tehsil.

The proportion of workers engaged in household industry is again highest in Bagha Purana (5.79 per cent) and the lowest in Moga (4.65 per cent). Among these, two tehsils one fall above and one below the district average.

The participation of females in non-agricultural sector is greater than the agricultural sector. In the district 73.39 per cent female workers are engaged in non-agricultural sector (HHI-11.98 per cent and OW- 61.41 per cent).

Table 34 presents distribution of workers by sex in four categories of economic activity in C.D. blocks. Among rural workers in the district, 32.25 per cent are cultivators, 28.64 per cent are agricultural labourers, 5.32 per cent are household industry workers and 33.78 per cent are other workers. This shows that 60.89 per cent of rural workers are engaged in agricultural and 39.10 per cent in non-agricultural sector.

Among C.D. Blocks, the proportion of rural workers recorded as cultivators is the highest in Zira (P) 77.14 whereas the lowest has been observed in Moga-II (29.60 per cent). Likewise, the proportion of Agricultural labourer shows a variation of 0 per cent in Zira (P), follows 27.1 in Moga-II and highest 30.36 per cent in Nihal Singhwala CD blocks. The proportion of rural workers engaged in household industry also exhibits significant variation at CD block level. It is highest in Dharmkot (6.47 %) and lowest in Moga-I (3.14 per cent).'Other workers' constitute nearly one third of the rural workers, percentage of other workers in each CD block is 32.29 per cent in Dharamkot, 37.94 per cent in Moga-I, 39.09 per cent in Moga-II, 30.42 per cent in Bagha Purana and 32.78 per cent in Nihal Singhwala and 17.14 in Zira(P).In district rural percentage of Other workers is 33.78 %. Further, it reveals that participation of females is greater in non-agricultural sector in comparison with the agricultural sector except Dharmkot & Zira (P).

Among rural female workers in the district, 34.11 per cent (C- 11.51 per cent and AL-22.60 per cent) are agricultural workers and 65.89 per cent (HHI-13.56 per cent and OW-52.33 per cent) are non-agricultural workers.

Table 35 gives the distribution of workers by sex in four categories of economic activity of urban agglomerations/towns. Interestingly, almost one-twelth (8.04 per cent) of the workers in urban areas in the district are engaged in agricultural activities either as cultivator or agricultural labourer and the remaining 91.96 per cent are occupied in non-agricultural pursuits as household industry workers and other workers. The table reveals that among towns/ UA's the proportion of urban workers recorded as cultivator is the highest in Badhni Kalan (12.65%) which is fairly high and Dharamkot with 11.88 is 2nd highest The lowest being 2.24 in Moga UA. In district Moga the percentage of urban cultivator is 3.61.The proportion of agricultural labourers shows a variation of (11.58%) as the highest in Dharamkot MCl and (3.19 %) as the lowest in Moga UA whereas the district urban displays (4.43%).

It is further revealed that the percentage of household industry workers is the highest in Moga MCl (4.52) and the lowest in Dharamkot (1.79%).

The proportion of other workers also shows significant variation at town level with the highest (90.05%) in Moga UA and the lowest (74.75) in Dharamkot MCl while at district level it is observed as (87.85 %).

(vi) Brief analysis of the Village Directory and Town Directory data based on inset tables 36 to 45.

Table 36 shows distribution of villages according to availability of different amenities by CD blocks.

Education

Educational amenity is available to 92.16 per cent of villages in the district. It is in case of 25 villages this facility is not available within the villages, but the same can be availed at some distance.

Among the CD blocks, all the villages in Bagha Purana have educational facility available to them within the village. In Nihal Singhwala (97.37), Moga-II 95.35, Moga-I 93.48 per cent Dharamkot 87.5 per cent, and Zira (P) 0 per cent.

Medical

75.86 per cent villages in the district are equipped with some kind or the other medical facility. This percentage is as high as 94.74 per cent in Nihal Singhwala , 91.3 per cent in Moga-I, 86.05 in Moga II CD blocks. Bagha Purana 82.98 percentage and 87 villages out of 144 villages, 60.42 percentage in Dharamkot which is shows medical facility which is least.

Improved Drinking Water

The availability of improved drinking water refers to availability of drinking water through tap, handpump and tubewell. Its availability in district is 94.36 percentage.

Post Office

51.72 per cent of the villages in the district have availability of post office within the village and the villagers of the remaining 48.28 per cent avail this facility at some distance. 76.6 % of the villages in Bagha Purana block have the availability of post office, Besides this Moga-I and Nihal Singhwala 71.74 and 71.05 CD, Moga-II (72.09%) and Dharamkot 26.39 % having the availability of this facility less than that of the all Cd blocks.

Telephone

The availability of Telephone is available to all villages in the districts.

Transport and Communication

The villages in the district are fairly well equipped with transport and communication as 69.59 per cent of the villages have this facility. 97 (out of 319) villages are devoid of this facility, and avail it at some distance.

Banks

22.57 percentage in the district has a bank facility. In as many as four CD blocks the proportion of villages having banking facility is above the district average while 2 CD blocks Dharamkotand Zira(P) 11.81 percentage shows below district average.

Agricultural Credit Societies

Almost one out of every two villages (45.14 %) in the district has agricultural credit societies. Among the CD blocks it varies between 73.68 per cent villages in Nihal Singhwala and 26.39 per cent in Dharamkot and 0 % in Zira. In all, four CD blocks exhibit percentage of villages with agricultural credit societies above and two below the district average.

Approach by pucca roads

The percentage of villages approachable by pucca road is 86.2 percent in the district.

Power Supply

All the villages in the district are having power supply.

Table 37: Number and percentage of rural population served by different amenities, 2011

** Telephone includes Telephone,PCO and Mobile.

Table 37 shows number and percentage of rural population served by different amenities in the district. It is very satisfying that 99.34 percentage of the entire rural population in the district and its constituent CD blocks is being served by educational institutions. The same is true in case of safe drinking water supply, pucca roads and power supply.

As regards medical facility available, it is 93.05 percent of the total rural population. Among the CD blocks, the proportion of population served by medical institutions is highest in zira (P) (100%) and the lowest in Dharamkot (83.63). The position is fairly good in Moga I (98.93%), Bagha Purana (93.91), Moga-II (92.53%) and Nihal Singhwala (97.8%). Facility of drinking water is 97.21 percent in the Rural part through tap,handpump and tubewell.

Post offices are serving 81.28 per cent of the rural population in the district and this percentage of population varies between 90.79 per cent in Bagha Purana and 0% per cent in Zira CD block.Telephone facility is available to 100 per cent of the total population. The entire population in 6 C.D. blocks is availing the facility.

Transport and communication facility comprising bus and rail services is available to 82.82 per cent population of 6 C.D blocks. Nihal Singhwala is the only C D block where (90.69 %) of rural population is having the facility closely followed Moga-I (88.1%) and Moga–II (86.63 %) Bagha purana (84.74 %)P while in Dharamkot 67.51 and Zira(p) is 0 percent as it includes only a single village namely Dargah Saidan.Banks cater to the needs of 49.13 per cent population. Among the 6 C D blocks, the proportion of population served by banks is the

highest in Moga-I 60.47 percent whereas it is only 36 % in Dharamkot and 0 % in Zira (P).A large number of people are having the facility of agricultural credit societies. In this regard CD blocks Nihal Singhwala (83.72 %) and Moga-I (82.14 %) Bagha Purana (77.2 %) and Moga-II 64.17 surpass district average (71.96 %).

Table 38: Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available, 2011

Table 38 shows distribution of villages which are not having certain amenities arranged by distance ranges from the places where these are available.

Education

24 villages, which do not have educational amenity and avail it within a distance of less than 5 kms and 6 villages within 5-10 kms. 121 villages in the district do not have middle schools. However, among them, this facility is available within 5 kms in case of 83 villages, and for the remaining 38 villages, it is available at a distance of 5-10 kms.

314 villages do not have Degree Colleges. In fact only 5 villages in the district have a degree college. However, this facility is available to 15 villages less than 5 kilometers, in case of 47 villages at a distance of 5-10 kms. and the remaining 252 villages avail this facility by covering a distance of more than 10 kms.

Medical

300 villages in the district do not have availability of hospital within the village. The same is available to 37 villages less than 5 kms distance 139 villages avail it at a distance of 5-10 Kms and the residents of 124 villages cover a distance of more than 10 kms to avail this facility.

Likewise out of 276 villages, which do not have PHC, the same is available at a distance of less than 5 kms in respect of 77 villages, at a distance of 5-10 kms in case of 182 villages and at a distance of more than 10 kms to 17 villages.

Post office

Among the 154 villages in the district which do not have the post office, the same is available to 93 villages less than 5 kms, at a distance of 5-10 Kms in case of another 54 villages and the remaining 7 villages avails this facility by covering more than 10 kms.

Telephone

The district is well equipped with this facility there is hardly any village which do not have this facility.

Bus Service

There are 104 villages, which do not have bus service available to them in the village but 35 can avail it at distance of less than 5 kms. 50 villages avail at the distance 5-10 and 19 village avail it at a distance of more than 10 kms.

Bank

Rural banking seems to be lacking in the district. Commercial banking within the village is not available in 273 villages. Among them 76 villages avail this facility at a distance of less than 5 kms. In case of 129 villages it is available at a distance of 5-10 kms and for the remaining 68, villagers travel a distance of over 10 kms to avail this amenity.

Likewise, Co-operative banking facility is not available in 258 villages. Among them 91 villages avail it less than a distance of 5 kms and in case of 114 villages it is available at a distance of 5-10 kms and for the remaining 53, villagers have to travel a distance of over 10 kms to avail this amenity.

Agricultural Credit Societies

Out of 175 villages, which are not having Agricultural Credit Societies, 83 can avail this facility less than a distance of 5 Kms and for 57 villages it is available at a distance of 5-10 kms and only 35 village avails this facility by covering more than 10 kms.

Table 39: Distribution of villages according to the distance from the nearest statutory town and availability of different amenities, 2011

@ Bank includes Commercial Bank and Cooperative Bank.

** Telephone includes Telephone, PCO and Mobile.

Table 39 shows that 29 villages in the district are located within a distance of less than 5 kms, 203 villages in the distance range of 5-15 Kms and 87 villages are located within 16-50 Kms from the nearest statutory town. None of the villages falls in 51 + and unspecified ranges.

Maximum number of villages (203) fall in the distance range of 5-15 Kms and among them educational facility is available to 187 (92.12 per cent) villages, medical facility is available to 156 (76.85 per cent) villages, post office to 100 (49.26 per cent) villages and 203 (100 per cent) villages have availability of telephone. Transport and communications facility is available to 135 (66.5 per cent) villages, 46 (22.66 per cent) villages have banks and 85(41.9 per cent) villages have agricultural credit societies and 177 (87.19%) villages in this range are approached by pucca road. Similar trends are seen in the availability of amenities in the distance range of 16-50 kms.

Note:-

* Education includes all education facilities.

^ Medical includes all medical facilities.

Post office includes post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

@ Bank includes Commercial Bank and Cooperative Bank

** Telephone includes Telephone, PCO and Mobile

Table 40 presents distribution of villages by population ranges and amenities available. Out of 319 villages, 64 have a population of less than 500, 48 fall in size class of 500-999, 72 have population in the range of 1,000-1999, 92 in the range of 2,000-4999, 37 villages comprise the size class 5,000-9,999 and 6 villages are having population of 10,000 or more.

Educational facility is available to cent per cent of the villages under various size classes, barring size class 1-499 where out of 64 villages, 43 (67.19 per cent) and size 500-999 where out of 48, 44 villages have this facility.

Medical facility is available to all the 37 villages having population of 5,000 or more. Among others, this facility is available to 36 (75 per cent) villages in the range of 500-999, 58(80.56 per cent) villages with population 1,000-1,999, and 86 (93.48 per cent) villages in size class 2,000-4,999.

Improved drinking water is available in 70 out of 72 villages 97.22 percent in the range of 1000-1999, 90 out of 92 having range of population 2000-4999 and 100 percent in the range of 10,000 or more. In the range of 500-999 drinking water is available in 46 villages out of 48 villages and in the size class 1-499 , 53 out of 64 villages, 82.81 percent avail this facility.

Post office is available in all the 6 villages having population of 10,000 or more. Among others, this facility is available to 2(3.12 per cent) villages in the population range of 1-499,

11 (22.92 per cent) villages in size class 500-999, 35(48.61%) villages with population 1,000-1,999, 74 (80.43 per cent) villages in size class 2,000-4,999 and 37(100 per cent) villages with population 5000-9999.

Cent per cent of the villages with population in all 319 villages have availability of telephone.

Transport and communication is available in 35 villages 94.59 percent under size classes 5000-9000, and 100 percent in all 6 villages in the range 10000. Even among the smaller villages, this facility is available to 23(35.94 per cent) villages with population below 500, and 33 (68.75 per cent) villages in size class 500-999 and 53 (73.61 per cent) villages in size class 1000-1999. 72 villages (78.26 percent) villages in the range of 2000-4999.

Availability of banks is predominantly the characteristic of larger villages. 6 (100 per cent) villages with population 10,000 or more have banks. Likewise, 1(2.08 per cent) villages in size class 500-999, 6 (8.33 per cent) villages with population in the range of 1000-1999, 31(33.7 per cent) villages with population in the range of 2000-4999 and 28(75.68 per cent) villages with population range 5000-9999 have the availability of banks.

Agricultural credit societies are available in all the villages under population size 10,000+, it is 86.49 percent in the range of 5000-9999. It is also available to 70.65 per cent of villages with population 2000-4999, 38.89 per cent villages in size class 1,000- 1,999, 16.67 per cent villages having population in size class 500-999 and 7.81 per cent villages with population below 500.

Out of 319 villages 275 villages are approachable by Pucca road which is 86.21 percent. All the villages in the district have the availability of power supply.

Table 41: Distribution of villages according to land use, 2011

Sr.No.	Name of CD Block	Number of inhabited villages	Total area (in Hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	0064-Dharamkot	144	53931.07	89.93	99.48
2	0065-Moga-I	46	36322.3	86.09	99.8
3	0066-Moga-II	43	30955.88	90.95	98.7
4	0067-Baghapurana	47	55783.8	90.07	99.92
5	0068-Nihal Singhwala	38	39231.81	88.45	99.92
6	0070-Zira	1	32	90.62	100
	Total	**319**	**216256.9**	**89.2**	**99.61**

Note:- Culativable area= irrigated area + unirrigated area

CD blockwise villages, according to land use are given in Table 41. Bagha Purana CD block (55,783.80 hectares) is the largest and Moga-II (30955.88 hectares) Zira (only single village) (P) (32 hectares) is the smallest in area. In the district 89.20 per cent of the area is cultivable and among the CD blocks this percentage varies between 90.95 per cent in Moga-II and 86.09 in Moga-I. Four, out of 6 CD blocks have percentage of cultivable area greater than that of the district average. 99.61 per cent of the cultivable area in the district

is irrigated. All the CD blocks have fairly high proportion of their cultivable area under irrigation and this percentage varies between 100.0 per cent in Zira (P) and 98.70 per cent in Moga-II.

Table 42: Schools/ colleges per 10,000 population in towns, 2011

Sr. No.	Name of the town	Type of educational institution (Approx. numbers)				
		Primary	Middle	Secondary / matriculation	Senior secondary	College*
1	2	3	4	5	6	7
1	800200-Badhni Kalan (NP)	6	6	4	3	0
2	800201-Bagha Purana (M Cl)	7	4	4	3	0
3	800202-Moga (M Cl + OG)	1	0	0	0	0
4	800203-Dharamkot (M Cl)	2	1	5	3	1
5	034220-Kot Ise Khan (CT)	1	2	3	3	2
	Total	**17**	**13**	**16**	**12**	**3**

Note- * College includes
Arts/ Science/ Commerce College (Degree Level and above)

Table 42 shows number of schools/colleges per 10,000 population for towns. In the district there are 17 primary schools, 13 middle schools, 16 secondary/matriculation schools, 12 senior secondary schools and only 3 colleges per 10,000 population.

Table 43: Number of beds in medical institutions in towns, 2011

Sr. No.	Name of the town	Number of beds in medical institutions per 10,000 population (Approx. numbers)
1	2	3
1	800200-Badhni Kalan (NP)	44
2	800201-Bagha Purana (M Cl)	12
3	800202-Moga (M Cl + OG)	7
4	800203-Dharamkot (M Cl)	4
5	034220-Kot Ise Khan (CT)	62
	Total	**129**

Table 43 shows number of beds in medical institutions in towns per 10,000 population. The district on an average has 25 beds per 10,000 population. Among the towns, Kot Ise Khan has 62, Badhani kalan 44 beds per 10,000 populations, are higher than the district average. Bagha purana 12, Moga MCL 7, and Dharamkot are having lowest number of 4 beds per 10,000 population.

Table 44: Proportion of slum population in towns, 2011

Sr. No.	Name of the town having slum	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	800201-Bagha Purana (M Cl)	25206	5934	23.54
2	800202-Moga (M Cl + OG)	163397	17964	10.99
3	800203-Dharamkot (M Cl)	19057	6876	36.08
	Total	**207660**	**30774**	**14.82**

Table 44 shows proportion of slum population living in statutory towns in the district. Bagha Purana and Moga and Dharamkot towns have reported slum population. In absolute terms 30,774 persons are living in slums which accounts for 14.82 per cent of the total urban population. In the town of Bagha Purana 23.54 per cent of the total population is residing in slums and Moga 10.99 percent of the total population and in Dharamkot 36.08 percent residing in slums.

Table 45: Most important commodity manufactured in towns, 2011

Sr. No.	Name of the town	Name of three most important commodities manufactured
1	2	3
1	800200-Badhni Kalan (NP)	Cattle Feed, Agriculture Equipments, Wooden Furniture
2	800201-Bagha Purana (M Cl)	Rice Sheller, Cattle Feed, Flour Mills
3	800202-Moga (M Cl + OG)	Milk Products, Agriculture Equipments, Truck Bodies
4	800203-Dharamkot (M Cl)	Cattle Feed Factory, Cement, Rice Mill
5	034220-Kot Ise Khan (CT)	Rice Shellers Unit, Nil, Nil

Table 45 shows most important commodities manufactured in towns, 2011 the manufactured in the towns.The manufacturing of agricultural implements is an important commodity in all towns. Manufacturing of Agricultural equipment and milk products is chracterstics of Moga.

(vii) Major social and cultural events, natural and administrative developments and significant activities during the decade

During 1991-2001 five new districts were created. These namely are; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. Administratively, the State is divided into four divisions namely, Jalandhar, Patiala, Firozpur and Faridkot. As per Census 2011, there are 20 districts comprised of 77 tehsils, 217 towns and 12,581 villages. Among the towns, 143 have statutory status. The remaining 74 are Census towns, created based on laid down demographic criteria and are non-statutory in status. Out of 12,581 villages, 413 are uninhabited i.e. with zero population. As such, there is a net increase of 3 districts, 5 tehsils and 60 towns (4 statutory and 56 census towns) in Census 2011 over that of 2001.

Moga district is located at 30.8°N 75.17°E in central part of Punjab. Moga district is bordered by Jalandhar district in the north, Ludhiana district in the East, Barnala and Bathinda in the South and Faridkot and Firozpur in the West. It stretches between longitude 75° - 15', 75°

A complete detail of changes in territorial units during 2001-2011. Out of 20 districts in Punjab, seven districts which have not experienced any inter - district or intra - district jurisdictional change during this decade are; Kapurthala, SBS Nagar, Ludhiana, Firozpur, Faridkot, Bathinda and Mansa. The remaining 13 districts have undergone jurisdictional change at inter/ intra district level and Moga is one of these 13 districts. In 2001 Census there were 329 villages and 4 Towns in Moga District. In 2011 there are 325 villages and 5 towns. One village Paraliwala(218) has been transferred to Shahkot tehsil of district Jalandhar.One village Kot Isse khan treated as C T and 2 villages Landeke and Duneke treated as O.Gs.

(viii) Brief description of Places of tourist, religious, historical or archeological importance

Moga was formed as a new district on 23 November 1995 by carving out Moga and Nihal Singhwala Subdivisions of Faridkot District and some area of Zira Tehsil (45 villages of Zira Tehsil, 47 villages of Makhu Sub Tehsil along with the whole of Dharmkot Sub Tehsil). At present the district comprises three tehsils/subdivisions viz. Moga, Nihal Singhwala and Bagha Purana and two sub tehsils namely Dharmkot and Badhni Kalan.

Moga District falls under the jurisdiction of Firozpur Division. The district lies in the west of Punjab and is surrounded by Jalandhar District in the north, Firozpur District in the north-west, Faridkot District in the west, Ludhiana District in the east, Sangrur District in the south-east and Bhatinda District in the south. It is situated 30^{o} 29 and 30 53^{o} north latitude and 74^{o} 54 to 75^{o} 25 east longitude. It spreads over an area of 2,235 sq. km. It is 4.44 per cent of the total area of the Punjab State.

Dhudike

The village Dhudike is located to the south of village Ajitwal from Jagraon G. T. Road. It lies 3 km from Ajitwal railway station on the Ludhiana-Firozpur railway line and is linked with a pucca road between Moga and Jagraon, some 16 km from either town. The village has one rural hospital and one degree college viz. Lala Lajpat Rai Memorial Government College, Dhudike. Dhudike was the sub centre of Ghadar Movement from where nine Ghadari Baba's belong. Two Ghadari Baba's of this village were sentenced to death on 18 June 1916 at Lahore for Lahore Conspiracy case, two were given life time imprisonment, two were imprisoned for three years and one was jailed for six months.

Dhudike is not only the historical village of Moga District but it is also the birth place of Punjab *Kesri* Lala Lajpat Rai one of the most prominent patriots of India. Punjab *Kesri* Lala Lajpat Rai was born on 28 January 1865 to Munshi Radha Krishan and Gulab Devi at village Dhudike (his maternal village) district Moga. His birthday is celebrated every year in this village which attracts a large number of persons. Lala Lajpat Rai immensely contributed in attaining India's Independence. In 1920 after his return from America, he plunged into the Non-Cooperation Movement which was launched in response to the Rowlatt Act in principle. The movement was led by Lala Lajpat Rai in Punjab and he soon came to be known as Punjab *Kesri* (The Lion of Punjab). On 30 October 1928, to boycott the arrival of the members of the Simon Commission in Lahore, a peaceful procession, headed by Lala Lajpat Rai was launched. Intercepting the march, Superintendent of Police, Scott ordered his police force to '*lathi charge*' at the activists. The police targeted Lala Lajpat Rai, in particular, and hit him on the chest. The confrontation left Lala Lajpat Rai with severe injuries and also led to his death. A memorial-cum-museum has been erected here in the memory of the great freedom fighter which also contains photos of the patriots who participated in Ghadar Movement.

Daroli Bhai

The name of the village has been transcribed after the name of 'Gujjar' woman,'Daroli'. Daroli Bhai is an important historical place and is situated at a distance of 13 km. from Moga on the Moga-Firoz Shah road. Various historical places associated with the visit of Guru Hargobind Sahib located in this village are described below:

Gurdwara Guru Ka Mahal (Gurdwara Attari Sahib)

The history of this Gurdwara is associated with the visit of Sixth Guru Hargobind Sahib and his family. Bhai Sai Dass brother-in-law of Guru Hargobind Sahib constructed a palatial house and requested Guru Ji to visit the house. Guru Hargobind Sahib visited this place on the spiritual request of Bhai Sai Dass and stayed here for sometime. During this stay, the eldest son of Guru, Baba Gurditta Ji was born where now a magnificent Gurdwara named as '*Janam Asthan* Baba Gurditta Ji' stands. Some personal belongings of Guru Hargobind Sahib viz. the *chola* or *gown, kachhehra*, shawl of Mata Damodari Ji and an iron hot plate are preserved and displayed here for the devotees. It is said that Guru Ji cooked *chapattis* on this hot plate, when he founded a free kitchen on Baisakhi day in this village.

Besides the personal belongings of Guru Hargobind Sahib, a handwritten copy of Shri Guru *Granth Sahib* containing *Mohr* of Guru Gobind Singh Ji and *Rag Mala* is also preserved and displayed here for the devotees. At the time of Bhangani War this *Bir* was consigned by Guru Gobind Singh Ji to river Yamuna at Paunta Sahib.The *Bir* remained in Yamuna for nine days and about four hours. After the war Guru Ji sent five Sikhs to Yamuna and prayed their trust may be returned. The supplication was accepted and with the trap of water the *Bir* reached on the bank of the river. After occupying it, the Sikhs presented the *Bir* to Guru Sahib, who entrusted this *Bir* to Bhai Nand Chand Ji *wazir* of Guru Gobind Singh's army after the victorious end of Bhangani War.

Gurdwara Dehra Sahib (Angitha Sahib)

Gurdwara Dehra Sahib (Angitha Sahib) has been constructed in the memory of Mata Damodari Ji wife of Guru Hargobind Sahib who breathed her last in village Daroli Bhai. The place where cremation ceremony of Mata Damodari Ji was peformed was bestowed by Guru Hargobind Sahib as 'Kashi.' Later on cremation ceremonies of other near relatives of Mata Damodari Ji were also performed at this place.

Besides these Gurdwaras, Gurdwara Hargobind Sahib and *Smadh* Baba Des Raj Ji are also located in this village.

Gurdwara Lohgarh Sahib

Gurdwara Lohgarh Sahib is situated in village Dina (tehsil/subdivision, Nihal Singhwala) of the Moga District. It is located on the Barnala-Nihalsinghwala road. It is 15 km. from Nihalsinghwala and 13 km. from Bhadaur. After evacuating Anandpur Sahib in December 1705 A.D., Guru Gobind Singh ji came here and stayed for a few days. Guru Ji was served with devotion by Chaudhari Shamir and Lakhmir, grandsons of the local Chief Rai Jodh who fought on the side of Guru Hargobind Sahib Ji in the battle of Mahraj in December 1634 A.D.

At this place namely 'Kangar' 2 km. south of Dina, Guru Gobind Singh Ji wrote the famous letter in persian language called '*Zafarnama*' to Emperor Aurangzeb. The commemorative shrine established here is named Gurdwara Lohgarh Sahib. To commemorate the memory of Guru Gobind Singh Ji, a big religious fair is held here every year on 13 and 14 January. Here Guru Gobind Singh Ji discarded his blue dress of *Uch Ka Pir*. Till then, very few people know that *Uch Ka Pir* was none else but the tenth master. Nawab of Sirhind Wazir Khan also got the news about the Guru and consequently directed the Chaudhary to arrest the Guru and send him to Sirhind. A man of steadfast faith Shamir after

consulting his brother write back "Just as you hold your '*Pir*' in high respect, we too are dedicated to the service of our Guru, since he loves all, we cannot carry out your orders and we would beg to be excused".

Gurdwara Nanaksar, Takhtupura

Gurdwara Nanaksar Sahib is situated in village Takhtupura, tehsil Nihalsinghwala. It is 32 km. south east of Moga and is 3 km. from the main Moga-Barnala road between village Lohara and Bilaspur. The place has been sanctified by the visits of three Sikh Gurus viz. Guru Nanak Dev Ji, Guru Hargobind Sahib Ji and Guru Gobind Singh Ji. Separate shrines dedicated to each one of them are located there around a beautiful *sarovar* in the premises of Gurdwara Nanaksar. Gurdwara Sahib *Patshahi Pehli* is on the bank of *sarovar*, which commemorates the visit of Guru Nanak Dev Ji. Guru Ji came to this village alongwith *Bhai* Mardana and *Bhai* Bala. Guru Ji had a dialogue with Sidh Y*ogis* who lived on a nearby mound. Gurdwara Sahib *Patshahi Chhevin* marks the site of the camp where Guru Hargobind Sahib stayed when he came after winning the battle of Mahraj in the 1634 A.D. Gurdwara Sahib *Patshahi Dasvin* located on the eastern side of the *sarovar* is associated with the visit of Guru Gobind Singh Ji. Guru Ji came here on his way from Chakar to Dina in December 1705 A.D. He is said to have bathed in the *sarovar*. Every year *Jor* Mela is organized in a big way from 13 January to 17 January.

Gurdwara Gurusar, Lopon

This Gurdwara is situated in village Lopon, tehsil Nihal Singhwala in the memory of Shri Guru Hargobind Sahib Ji. Guru Ji stayed here for two days. A new building of Gurdwara was constructed in 1960.

Gurdwara Aaduporh Sahib

Gurdwara Aaduporh Sahib is situated in village Machhike 3-4 km. away from the main Barnala-Moga road and is near village Bilaspur and Himmatpur. The Gurdwara Aaduporh is a historical shrine commemorating the visit of Guru Hargobind Sahib Ji. Guru Ji came to the site while riding his horse, where now the present Gurdwara Sahib stands. At this place, Guru Ji met a holyman whose name was Aadu and asked him about the well being of the villagers. Aadu apprised Guru Ji that the village faces acute water problem hence the village development was suffering. On hearing the problem, it so happened that Guru Ji's horse struck on the ground with *porh* (Horse's hoof) and then water started pouring out of the earth. The water was sweet and in plenty. Thus, Guru Ji blessed the place with adequate water and left for Bilaspur. The historical well is located in the Gurdwara premises.

Gurdwara Malla Sahib, *Patshahi Chhevin*

Gurdwara Malla Sahib is situated in village Himmatpura once known as Jusampura of district Moga. It is 3 km. from Canal Bridge on Moga-Barnala road. The village is 8 km. from Machhike, Takhtupura as well as from Bhadaur. Gurdwara Malla Sahib is dedicated to Guru Hargobind Sahib, who had come to the village Himmatpura from village Bali located about two kilometers away.

On hearing of Guru Hargobind Sahib's arrival, a large number of people gathered to get his blessings. In that congregation, villagers from nearby place named Jusampura, came

to Guru and requested him to bless their village by paying a visit there. Guru Ji expressed his inability, however he told them that he would come to their village as and when possible. Thereafter they went back but interestingly enough, one of the villagers had managed to steal the saddle of Guru's horse. Next day Guru Ji was told about the theft. On the following day Guru Ji went towards their village Jusampura. The villagers extended whole hearted hospitality to Guru and requested forgiveness for the saddle mischief by saying that the man who had taken the saddle was mad. When Guru noticed that the saddle thief had returned the saddle back without one of its *pedas* (gold ring), he expressed his unhappiness over the thief's behaviour. Leaving the place Guru blessed the villagers for their prosperity. Guru also changed the name of the village Jusampura to Himmatpura.

(ix) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Moga District is the 17th District drawn on the map of Punjab State on 24th day of November 1995. Before this, Moga was the sub-division of Faridkot District. Moga town the head quarter of the District is situated on Ferozpur-Ludhiana road. Area of Dharamkot block with 150 villages has been merged in Moga district vide. Pb. Govt. notification No. 2/36/98-R.E. 2(1) 6408 dated 5-11-99. As per figures of 2011 census the Moga District ranks 11th with in Punjab with a population of about 995,746, which is 3.6 percent of the total population of Punjab State. There are 893 females per thousand male in Moga district by census 2011, which is 6 points more than found in 2001 census, that was 887. Although rate of population growth is 11.3 but the density of population has increased, which is 444 per sq. km. as compared to 400 by 2001 census. In Moga District 63.94 percent population is literate, where as the rate for male & female literacy is 68.40 & 58.96 respectively.

Contribution in the form of Historical figure Moga is birth place of Punjab Kesari Lala Lajpat Rai who was born on 28 january 1865 in Dudike village of Moga district. His birthday celebrated every year in this village. Lala Laj Pat Rai immensely contributed in attaining the India's independence.). On 30 October 1928, to boycott the arrival of the members of the Simon Commission in Lahore, a peaceful procession, headed by Lala Lajpat Rai was launched. Intercepting the march, Superintendent of Police, Scott ordered his police force to '*lathi charge*' at the activists. The police targeted Lala Lajpat Rai, in particular, and hit him on the chest. The confrontation left Lala Lajpat Rai with severe injuries and also led to his death. A memorial-cum-museum has been erected here in the memory of the great freedom fighter which also contains photos of the patriots who participated in Ghadar Movement.

There are many Historical Gurudwaras in this District which are:
Gurdwara Guru Ka Mahal (Gurdwara Attari Sahib). Gurdwara Dehra Sahib (Angitha Sahib), Gurdwara Lohgarh Sahib Gurdwara Gurusar, Lopon, Gurdwara Aaduporh Sahib, Gurdwara Malla Sahib, *Patshahi Chhevi.n*

(x) Scope of Village and Town Directory

Village Directory:

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

Town Directory :

The Town Directory is presented for each town covering different aspects of urban life. Like 2001 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV- A in 2001 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc. Hence the data for the towns have been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of the District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2010). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms., while Column 7 presents number of households including houseless households. Columns 8 to 21 give population and growth rate of towns since 1901. Column 22 presents density and Columns 23 to 25 present sex-ratio.

Statement II shows physical aspects and location of each town as in 2009. Column 2 shows the name and Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 12 show the name and distance of State HQ, district HQ, Tehsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility etc. , from town.

Statement III provides information for civic and other amenities available to the Town. The Columns 3 6 to 19 present data regarding road length, system of drainage, number of latrines, sewerage, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement IV provides information regarding medical facilities available in the towns. The columns 3 to 12 give the information on number of facilities available for hospital (allopathic and others) Dispensaries/Health Centre, Family Welfare Centre, Maternity and Child Welfare Centre, Maternity homes, T.B hospitals/Clinic, Nursing homes, Veterinary hospitals, Mobile Health Clinic and others with the number of beds available in brackets. Charitable hospital/Nursing homes and Medicine shops available in the town are shown in column no. 13 and 14.

Statement V gives information regarding educational, recreational and cultural facilities available in the town. The columns 2-13 indicates the number of educational facilities available in towns viz., Primary, Middle, Secondary, Senior Secondary, Colleges (Arts, Science, Commerce of degree level and above), Engineering colleges, Management Institute/colleges, Polytechnics and other institutes.

This Statement also shows, number of special schools for disabled, working women's hostels, old age homes, stadium, recreational and cultural facilities available in the town under Columns 15 to 23.

Statement VI presents information in respect of industry and banking services in the town. Columns 3 to 5 indicate three most important commodities exported and manufactured in the Town. Information on number of banks (Natinalised, Private and Co-operative banks) available in the town has been presented under column 6-8 whereas Columns 9 and 10 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the towns having slums falling in the jurisdiction of district as per 2009.

Village and Town Directory

Section I – Village Directory

Brief Note on Village Directory

The Village Directory is being compiled for both inhabited and un-inhabited villages. In the village directory both private and government facilities/institutions have been given. In case of un-inhabited /depopulated villages, the location code number, name and area of the village is being given universally in Village Directory and Village PCA. The columns relating to the amenities and land use pattern, etc. being left blank and it will be noted against the name of the village that it is un-inhabited/depopulated. The Appendices to Village Directory and Inset Tables based on village Directory data are also prepared for inhabited villages.

In the Village Directory format for 2011 Census there are 121 columns and the details thereon are as follows:

Columns 1: Serial Number: - Self explanatory. All the villages within the CD block are presented serially in the ascending order of their location code number.

Columns 2: Name of village: - Self explanatory. The name of the villages are shown against this column. This also includes the forest and uninhabited villages.

Columns 3: Location Code Number of village. The location code number of the villages are shown against this column.

Columns 4: Area of the Village: - The area of the villages has been given in hectares.

Column 5: Total Population: - The total population of the village as per 2011 Census has been given against this column.

Column6: Number of Households: - The number of households as per 2011 Census have been given in this column.

Amenities: - The availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the Village Directory. Wherever the amenities are not available in the village, the distance range code viz; 'a' for <5 Kms, 'b' for 5-10 Kms and 'c' for 10+ Kms of the nearest where facility is available is given. Column wise details are given below:

Columns No. 7 – 20 Educational Facilities: - All the different educational facilities available in the village have been given under these columns. Nursery/LKG//UKG classes are included in Pre-Primary Schools, Classes up to class V included in Primary School; Classes from VI to VIII are included in the Middle school. Classes from IX and X included in Secondary School. Classes from XI and XII are included in Senior Secondary School. In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively. The information on the entire educational institutes is given under these columns.

Columns No. 21 to 38 - Medical Facilities: - All the different medical facilities available in the village have been given under these columns.

Columns No. 39 to 46 -Drinking Water: - The information on availability of various types of the drinking water facility within the village has been given under these columns.

Columns No. 47 to 50 – Availability of Toilet and others:- The information on availability of toilet and Bio-Gas etc. available in the village has been given under these columns.

Columns No. 51 to 67 Communication (Post & Telegraph and transport):- The information on communication and Post Office, Sub-Post Office, & Telegraph Office, Village PIN Code number, Phone-Landlines, Mobile Phone, Private Courier Facility, Internet Café, etc; available in the village has been given under these columns. The information on all various transport facilities whether public/private transport like Bus, Railway Station, or Navigable waterways, Taxi , Van, Tractors etc. available in the village has also been given under these columns.

Columns No.68 to 79–Village connected to High ways, Village Roads, Banks and Credit Societies:- The information on all roads connected to village has been given under these columns. These include National Highway, State Highway, District Roads and other district roads connected to the village, Pucca roads, Kutchcha Roads, Water Bounded Macadam Roads, Navigable Water Ways and Foot Paths has been given under these columns. Further, the information on availability of banks, ATM and Agricultural Credit societies in the village has been given under these columns.

Column No. 80 to 97 Miscellaneous Facilities: - The information on various miscellaneous facilities available in the village has been given under these columns. These includes Self - Help Group, Public Distribution Shop (PDS), Mandi /Regular Market, Weekly Haat, Agricultural Marketing Society, Nutrition Centre(ICDS),Anganwadi Centre, ASHA, Community Centre, Sports Fields, Sports Club/Recreation Centre, Cinema/Video Halls, Public Library, Public Reading Room, News Paper Supply, Assembly Polling Station, Birth and Death Registration Office.

Columns No. 98 to 101 – Electricity: - Availability of Power Supply in the village, whatever may be the form of its use has been given in these columns. These include Electricity for Domestic Use, Electricity for Agriculture Use Electricity for Commercial Use, and Electricity for all purpose Domestic Uses.

Column No. 102 and 103 -Nearest Town: - The name of the nearest town along with the distance range code has been in these columns.

Land use and Irrigation: - The land use pattern in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the following 9 categories.

(i)-Column No. 104 -Forests:-This includes all lands classed as forest under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests remain included under the forest area.

(ii)-Column No. 105- Area under non-agricultural use:-This includes all lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agriculture.

(iii)-Columns No. 106 -Barren and un-culturable land:-This includes all barren and unculturable land like mountains, deserts, etc. land which cannot be brought under cultivation except at an exorbitant cost should be classed as unculturable whether such land is in isolated blocks or within cultivated holdings.

(iv)-Column No. 107- Permanent Pastures and other Grazing Lands:-This includes all grazing lands whether they are permanent pastures and meadows or not. Village common grazing land is included under this head.

(v)-Column No. 108- Land under Miscellaneous Tree Crops, etc.:- This includes all cultivable land which is not included in 'Net area sown' but is put to some agricultural uses. Lands under Causing trees, thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under 'Orchards' are classed under this category.

(vi)-Column No. 109- Culturable Waste Land :- This includes lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category at the end of the five years.

(vii)-Column No. 110- Fallow Lands other than Current Fallows: - This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

(viii)-Column No. 111- Current Fallows:- This represents cropped area, which is kept fallow during the current year. For example, if any seeding area is not cropped against the same year it may be treated as current fallow.

(ix)-Column No. 112- Net Area Sown:- This represents the total area sown with crops and orchards. Area sown more than once; in the same year is counted only once.

Column No. 113- Total Irrigated Land Area: - It includes all land which is cultivable and irrigated by any source of irrigation. The total irrigated area of the village has been given under this column.

Column No. 114 - Total Un-Irrigated land Area: - Un-Irrigated area includes all land which is cultivable but not irrigated by any source of irrigation. The total un-irrigated land area of the village has been given under this column.

Column No. 115 to 119 Area Irrigated by source: - The area irrigated by various source of irrigation in the village have been given under these columns. The different source of irrigation facilities available in the village are as follows:

(i)-Canals(C)-Govt. or Pvt., (ii)-Wells/Tube-wells (W/TW), (iii)-Tanks/Lake(T/L), (iv)-Waterfall,(WF) and (v)-Others(O).

Columns No.120 to 122 -Three most important commodities manufactured:- The names of three most important commodities manufactured in the village are indicated in this column.

C.D. Block level totals of the Village Directory:-

At the end of entries for the Village Directory of each C.D. Block, the totals of different columns are being given wherever possible. However, in case of some of the columns, it may not be possible to work out the CD Block level totals, in such cases the particular of relevant columns are being left blank against C.D. Block level.

Brief Note on Town Directory

Town Directory Census 2011

Statement I: - Status and Growth History:

Column 1:- Serial Number:-

Self explanatory

Column 2:- Class, Name and civic status of town:-

The Class is presented according to population of the towns in 2011 Census as follows:

Population	Class	Population	Class
100,000 and above	I	10,000 – 19,999	IV
50,000 – 99,999	II	5,000 – 9,999	V
20,000 – 49,999	III	Below - 5,000	VI

The following abbreviations are used to denote the Civic Status of the town.

	Civic Status	Codes		Civic Status	Codes
i	Municipal Corporation	M.Corp.	xii	Notified Town Area	NTA
ii	Municipal Committee	MC	xiii	Industrial Notified Area	INA
iii	Municipal Council	M Cl	xiv	Industrial Township	ITS
iv	City Municipal Council	CMC	xv	Township	TS
v	Town Municipal Council	TMC	xvi	Town Panchayat	TP
vi	Municipal Board	MB	xvii	Nagar Panchayat	NP
vii	Municipality	M	xviii	Town Committee/ Town Area Committee	TC
viii	Cantonment Board/Cantonment	CB	xix	Small Town Committee	ST
ix	Notified Area	NA	xx	Estate Office	EO
x	Notified Town	NT	xxi	Gram Panchayat	GP
xi	Notified Area Committee/ Notified Area Council	NAC	xxii	Census Town	CT

Column 3 - 25: -

These columns are self explanatory

Statement II: - Physical Aspects and Location of town, 2009.

Column 1 - 2 Serial number and Name of town: -

Self explanatory

Columns 3 to 5 - Physical Aspects:-

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Columns 6 to 12:-

Name and road distance of the town (in kms.) from the State headquarters, District headquarters, Sub-divisional/Taluk/Tehsil/ Police station/ Development Block/Island HQ., Nearest city with population of one lakh and more, Nearest city with population of five lakh and more, Railway station and Bus route is recorded in these

columns respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Statement III – Civic and other Amenities, 2009:-

Column 1 - 2 Serial number and Name of town: -

Self explanatory

Column 3 – Road length (in km.**):-**

The information about the road length (in km.) within the limit of the town is recorded in this column.

Columns 4 to 7- System of drainage: -

The system of drainage available in the town is indicated in these columns by the following codes:

System of drainage	Codes
Open drains	OD
Closed drains	CD
Both drains	BD

Columns 8 to 11-Number of latrines: -

The number of various types of latrines available in the town is indicated in these columns.

Columns No. 12 & 13 – Protected water supply: -

The information on source of water supply and system of water storage with capacity available in the town are given in these columns in the following codes:

Column 12 (Source of water supply):-

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 13 (System of water storage):-

(i)	Over Head Tank	OHT
(ii)	Service Reservoir	SR
(iii)	River Infiltration Gallery	RIG
(iv)	Bore Well Pumping System	BWP
(v)	Pressure Tank	PT

The information on 2 major source of water supply is given in column 12 and the system of water storage with capacity against each in kilo-litres (in bracket) is presented in column 13.

Columns 14 Fire Fighting Service: -

In case the fire fighting service is available in the referent town, `yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Columns 15 to 19- Electrification (Number of connections):-

Different types of electric connections have been shown in these columns, i.e., Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement IV: Medical Facilities, 2009:-

Columns 1 - 2 Serial number and Name of town: -

Self explanatory

Columns 3 to 13 :-

The number of various medical institutions such as Hospitals, Dispensaries, Health Center, Family Welfare Center, Maternity and Child Welfare Center, Maternity Homes, T.B. Hospital/clinic, Nursing Homes, Charitable Hospital/Nursing Home, Mobile Health Clinic and Others as available in the town, are indicated in these columns (along with number of beds in brackets).

If a medical facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Column 14 - Veterinary Hospital:-

The Number of Veterinary Hospitals available in the town is given in this column.

Column 15 - Medicine Shop:-

The number of Medicine shops available in the town is given in this column.

Statement V: Educational, Recreational and Cultural Facilities, 2009

Columns 1 - 2 Serial number and Name of town: -

Self explanatory

Columns 3 to 15 Educational Facilities:-

The information on number of Primary school, Middle school, Secondary school, Senior Secondary school, Arts/Science/ Commerce colleges (of degree level and above), Medical colleges, Engineering colleges, Management Institute/Colleges, Polytechnics, Recognized Shorthand, Typewriting and vocational training Institutions, Non-formal Education Center (Sarva Shiksha Abhiyan Center), Special School for disabled and Others available in the town, are indicated in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Columns 16 to 23 – Number of Social, Recreational and Culture Facilities :-

The information on No. of Home Orphanage, Working women's hostels (with No. of seats in bracket), No. of Old Age Home, Stadium, Cinema Theatre, Auditorium/Community halls, Public libraries and Reading rooms available in the town are given under these column.

Statement VI: Industry and Banking 2009:-

Columns 1 - 2 Serial number and Name of town: -

Self explanatory

Columns 3 to 5 - Names of three most important commodities manufactured:-

The names of three most important commodities manufactured in the town are given under these columns.

Columns 6 to 8 - Number of banks: -

The number of banks available in the referent town both Commercial and Co-operative banks are recorded against these columns.

Columns 9 & 10 – Number of Agricultural and Non Agricultural Credit Societies: -

The number of Agricultural and Non Agricultural Credit Societies available in the referent town are given in these columns.

Statement VII: Civic and other Amenities in Slums, 2009:-

This statement VII provides information on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.
